

The background of the image features a dark blue gradient on the left, transitioning into a large, vibrant, abstract shape on the right. This shape is composed of overlapping curved segments in shades of orange, pink, and purple, creating a dynamic, modern aesthetic.

AWS re:Invent

NOV. 27 – DEC. 1, 2023 | LAS VEGAS, NV

CON406-R

Amazon EKS: Infrastructure as code, GitOps, or CI/CD?

Roland Barcia

Worldwide Director, AppMod
AWS

Rajdeep Saha

Requirements

Developers

I would like to have a **full ownership** of my **application** and its **dependencies** deployment lifecycle

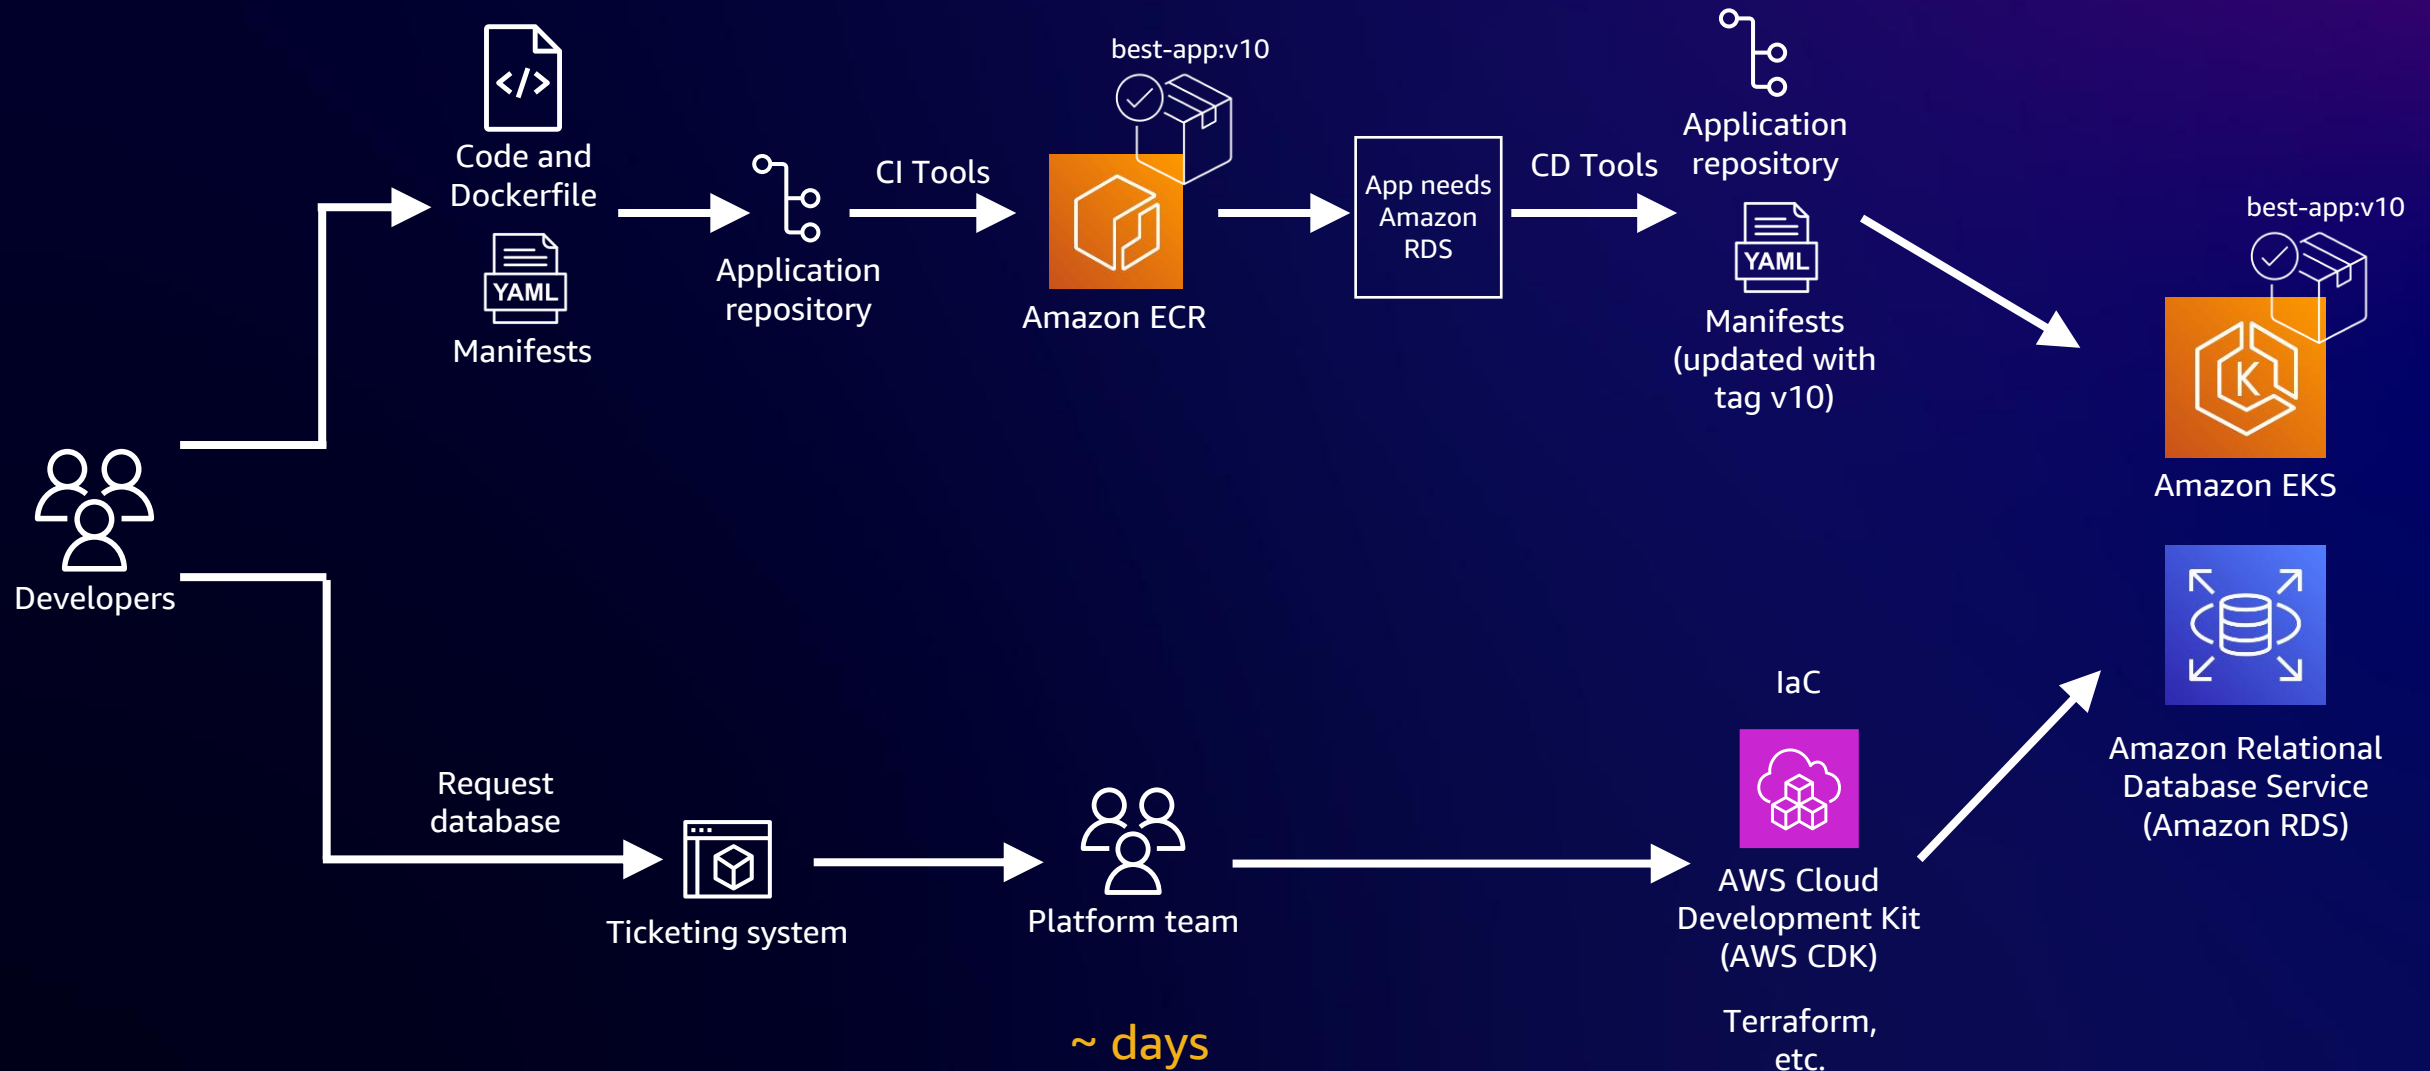

Platform team

I would like to **standardize** the deployment process for application teams while **enforcing** organizational standards

The big picture – AWS version

Traditional CI/CD for applications

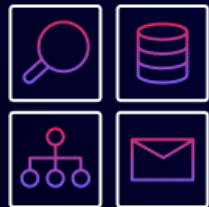

Traditional CI/CD consideration

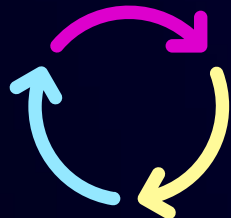

Tech stack is tried and tested

Developers focus on code
(Shift left $\neq$ Developers learning IaC)

Disjointed workflows take days

No drift detection and reconciliation

Whiteboard: GitOps with deployment and dependencies

Whiteboard: Creating clusters with GitOps

In summary

- Mix and match components based on organization needs
- Self-serving infrastructure accelerates product development
 - Developers able to create infra with best practices built in
 - GitOps is a powerful enabler
- There is no perfect tool
 - Use existing knowledge and blueprints

Resources

- [EKS blueprints](#)
- [GitOps Bridge](#)
- [CNOE: CNCF IDP tools](#)
- [ACK \(AWS Controllers for Kubernetes\)](#)
- [EKS workshop \(Flux, Argo, ACK, Crossplane\)](#)
