

The background of the image features a dark blue gradient on the left, transitioning into a large, vibrant, abstract shape on the right. This shape is composed of overlapping curved segments in shades of orange, pink, and purple, creating a dynamic, modern aesthetic.

AWS re:Invent

NOV. 27 – DEC. 1, 2023 | LAS VEGAS, NV

C O P 2 0 2 - R

Getting started with observability

Daniela Tzvetkova

Why AWS observability?

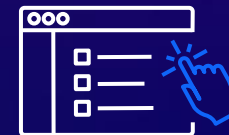

Understand
application health

Improve performance
and availability

Reduce
operational cost

Improve end-user
experience

Faster discovery and fixes of
potential bugs accelerated
feature development

Alleviated operational burden
to set up, configure, and learn
third-party systems

Resolved problems before their
customers notified them of issue

Building up to observability

Collect the telemetry

Monitor it (alerts and dashboards)

Analyze/troubleshoot

Key elements of monitoring and observability with Amazon CloudWatch

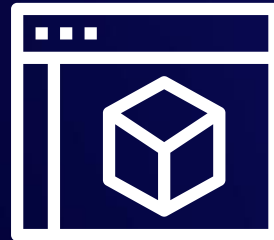

Amazon
CloudWatch

Day 1: What you have out-of-the-box

Vended metrics

Automatic
dashboards

Vended logs

Day 2: Customizable out-of-the-box insights

- Metric Insights queries (examples)
- Logs Insights queries (examples)
- (re:Invent – Public Preview) NLP query generator for logs and metrics insights queries
- Container Insights
- Lambda Insights

Day 3: Additional metrics best practices

Host metrics

Install
CloudWatch
Agent

Custom metrics

Install
CloudWatch
Agent

Access to application code

No access
to code

EMF Logs

PutMetricData
API

Log metric
filters

Day 4: Application log best practices

- Keep the application log free of spam
- Rate-limit an application log's error spam
- Include the corresponding request ID
- Log request IDs from failed service calls

Day 5: Alarms best practices

- Standard alarms
- Enhanced alarms
- Out-of-the-box recommended alarms

The screenshot shows the AWS CloudWatch console interface. At the top, there are tabs: 'Browse' (selected), 'Query', 'Graphed metrics (1)', 'Options', and 'Source'. On the right, there are buttons for 'Add math' and 'Add query'. Below the tabs, the 'Metrics (9,698)' section is active, with an 'Info' link. A toggle for 'Alarm recommendations' is turned on. To the right of the toggle are buttons for 'Download alarm code', 'Create alarm', 'Graph with SQL', and 'Graph search'. Below this is a search bar with a dropdown menu set to 'N. Virginia' and a search icon. The main content area is titled 'Metrics with alarm recommendations' and includes a subtitle: 'Choose the metric name in the widget legend or in the leaderboard to create the alarm with recommended settings.' Below this is a grid of service categories, each with a title, a count of models, a link to 'View automatic dashboard', and a purple alarm icon.

Service	Models	View automatic dashboard
Auto Scaling	8 models	View automatic dashboard
DynamoDB	23 models	View automatic dashboard
EC2	13 models	View automatic dashboard
ECS	3 models	View automatic dashboard
EFS	1 model	View automatic dashboard
ElastiCache	1 model	View automatic dashboard
Kinesis	1 model	View automatic dashboard
Lambda	13 models	View automatic dashboard
NATGateway	1 model	View automatic dashboard
Route 53	1 model	View automatic dashboard
S3	6 models	View automatic dashboard
SNS	1 model	View automatic dashboard

Day 6: Your first custom dashboard

- Cloning automatic dashboards
- Easy creation of dashboard infrastructure-as-code
- Filter dashboards by variable
- Custom widgets (samples)

Day 7: Additional useful and easy observability

- Synthetics
- Network monitoring
- Contributor Insights
