engineers!

How to forecast

Cloud cost forecasting

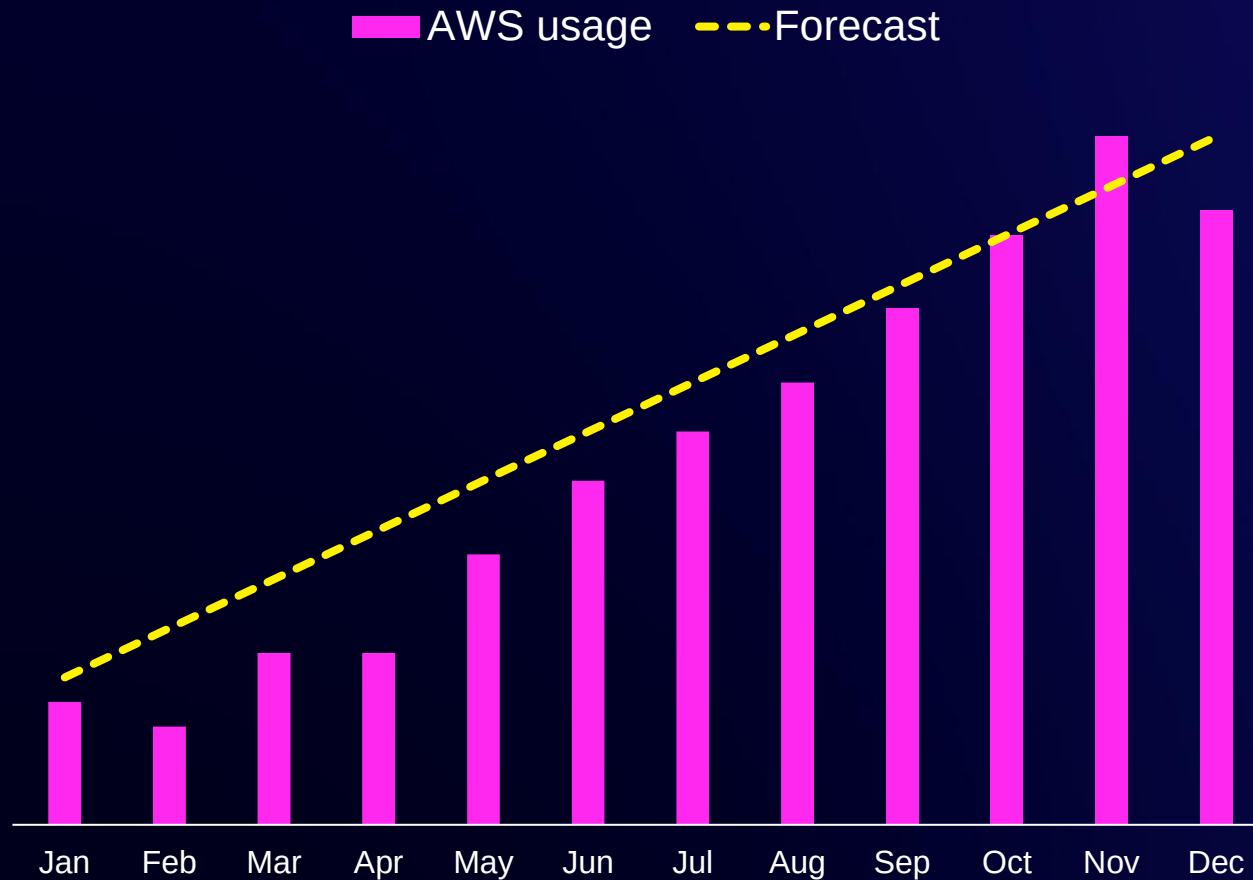

Existing workloads

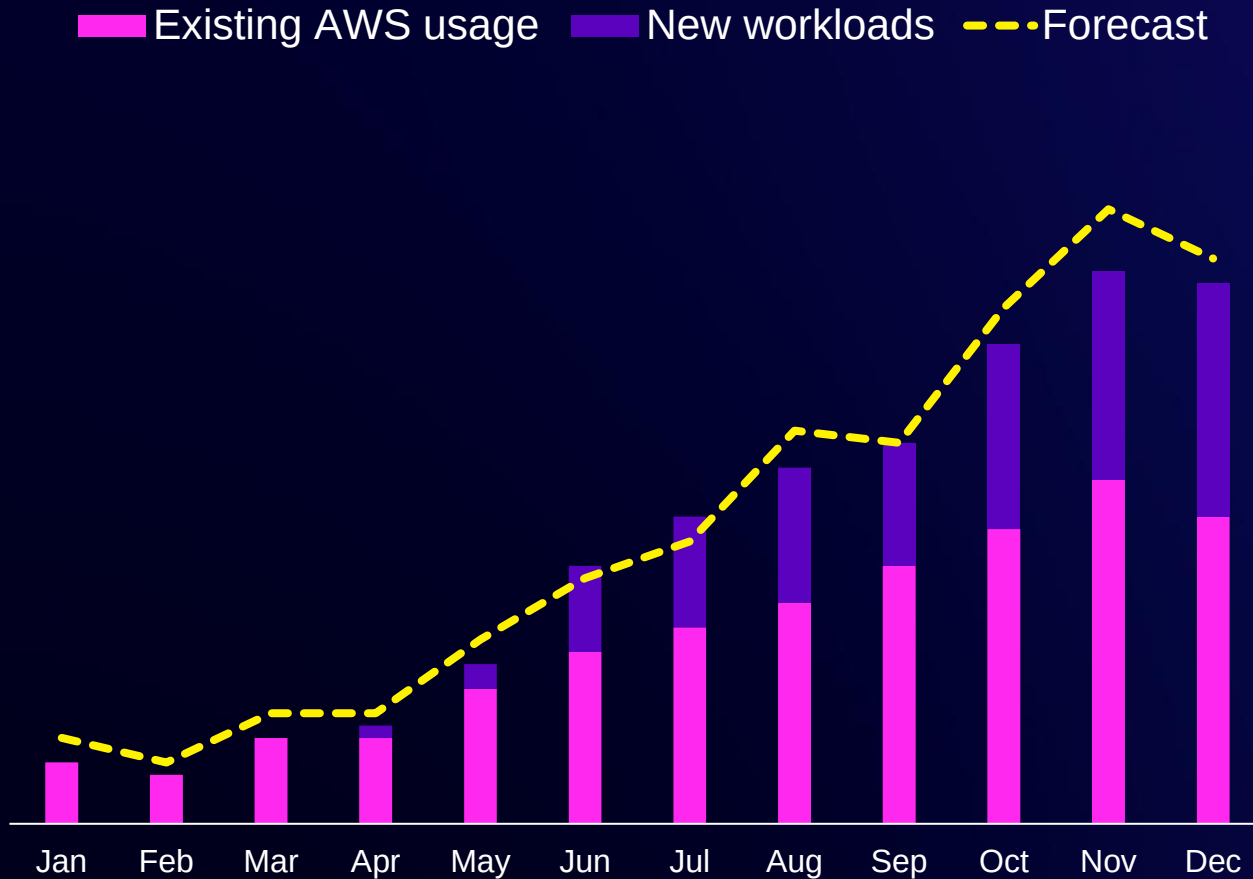

New workloads

Trend-based forecasting

- 1 Based on **historical data**
- 2 Forward-looking **extrapolation**

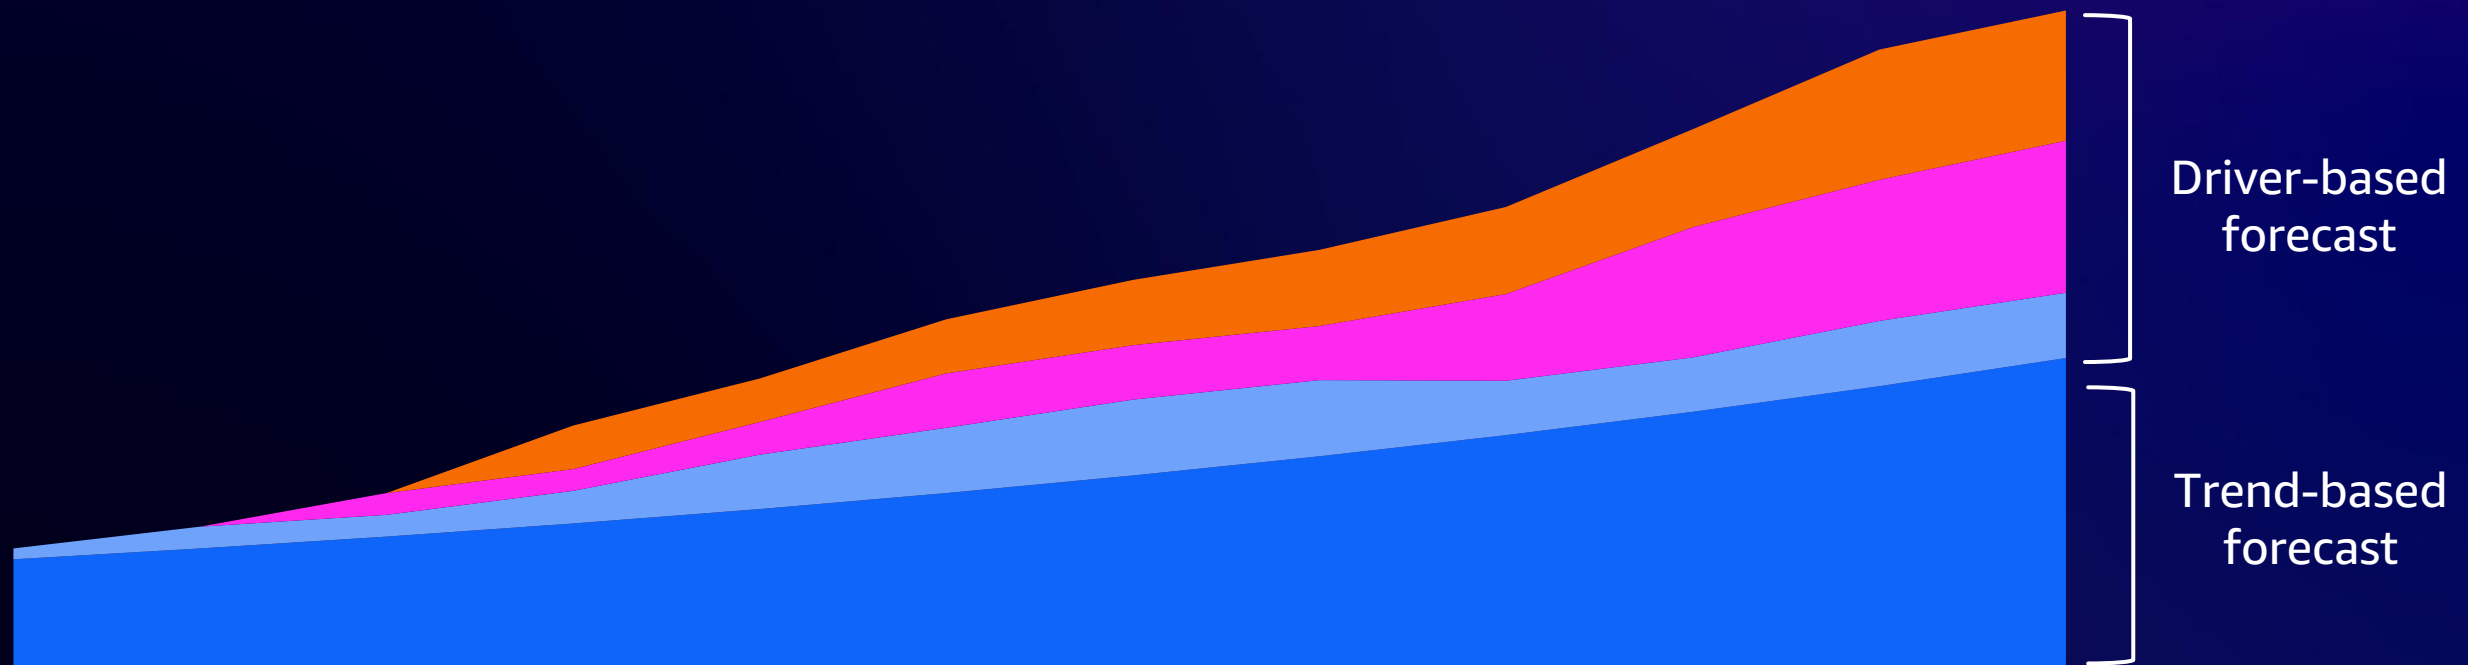

Driver-based forecasting

- 1 Factor in **business demands**
- 2 Improved **forecast accuracy**

Combining trend- and driver-based forecasts

■ Existing workloads ■ Migration ■ Product A ■ Product B

What's the difference?

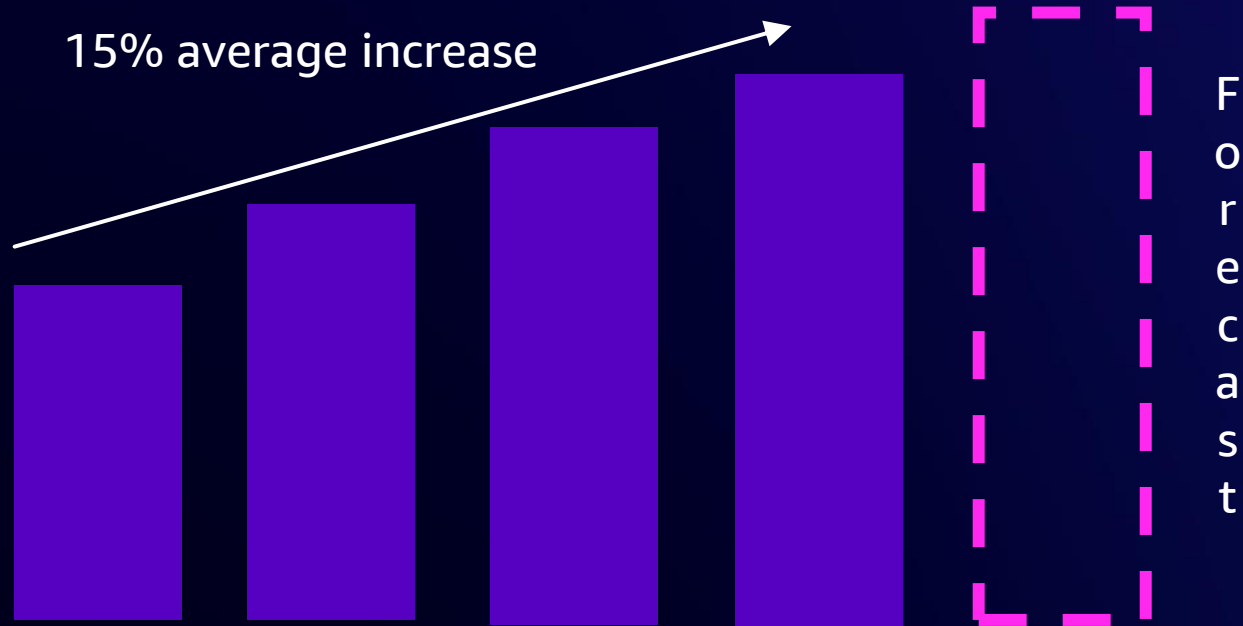

Forecast

Budget

Example forecast

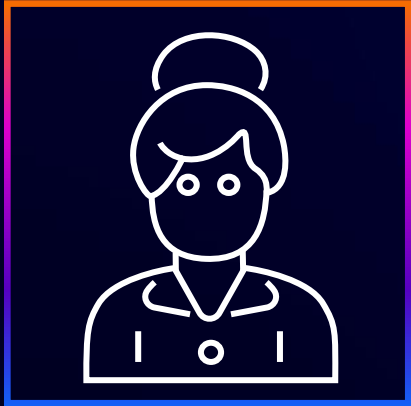

Example forecast

1. Percentage change
2. Cause of spend
3. Check with builders
4. Calculate

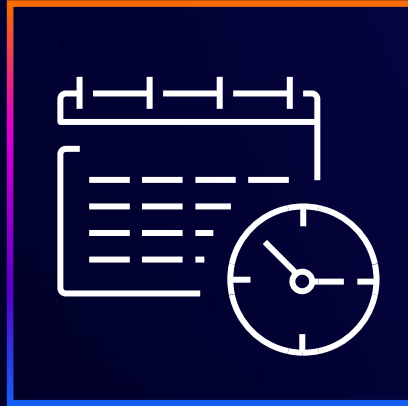

Key considerations

5 key elements

Audience

Business or technical?

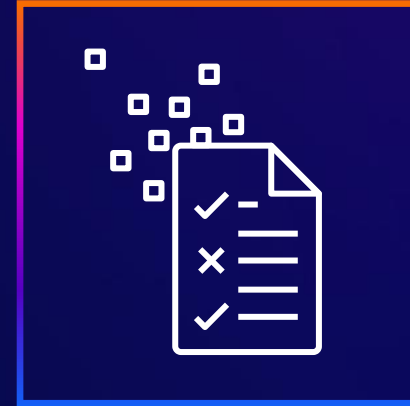

Frequency

Quarterly or daily?

Granularity

Per team or resource?

Accuracy

40%? 5%?

Actions

What will you do with this information?

Whiteboard time

What do we need to consider for forecasting for different audiences?

Wrap-up

Call to action

1. Look at your historical spend
2. Speak to your engineers
3. Make a prediction
