

The background of the image features a dark blue gradient on the left, transitioning into a large, vibrant, abstract shape on the right. This shape is composed of overlapping curved segments in shades of orange, pink, and purple, creating a dynamic, modern aesthetic.

AWS re:Invent

NOV. 27 – DEC. 1, 2023 | LAS VEGAS, NV

Improve application resiliency with SLO best practices

Andreas Bloomquist

Senior Product Manager,
AWS Application
Observability
Amazon Web Services

Arun Chandapillai

Senior WW Cloud Architect,
AWS ProServe
Amazon Web Services

Michael Hausenblas

Technical Product Manager,
AWS Open Source
Observability
Amazon Web Services

“

Everything **fails**, all the time

Werner Vogels

Amazon CTO

Don't leave **resiliency** to chance

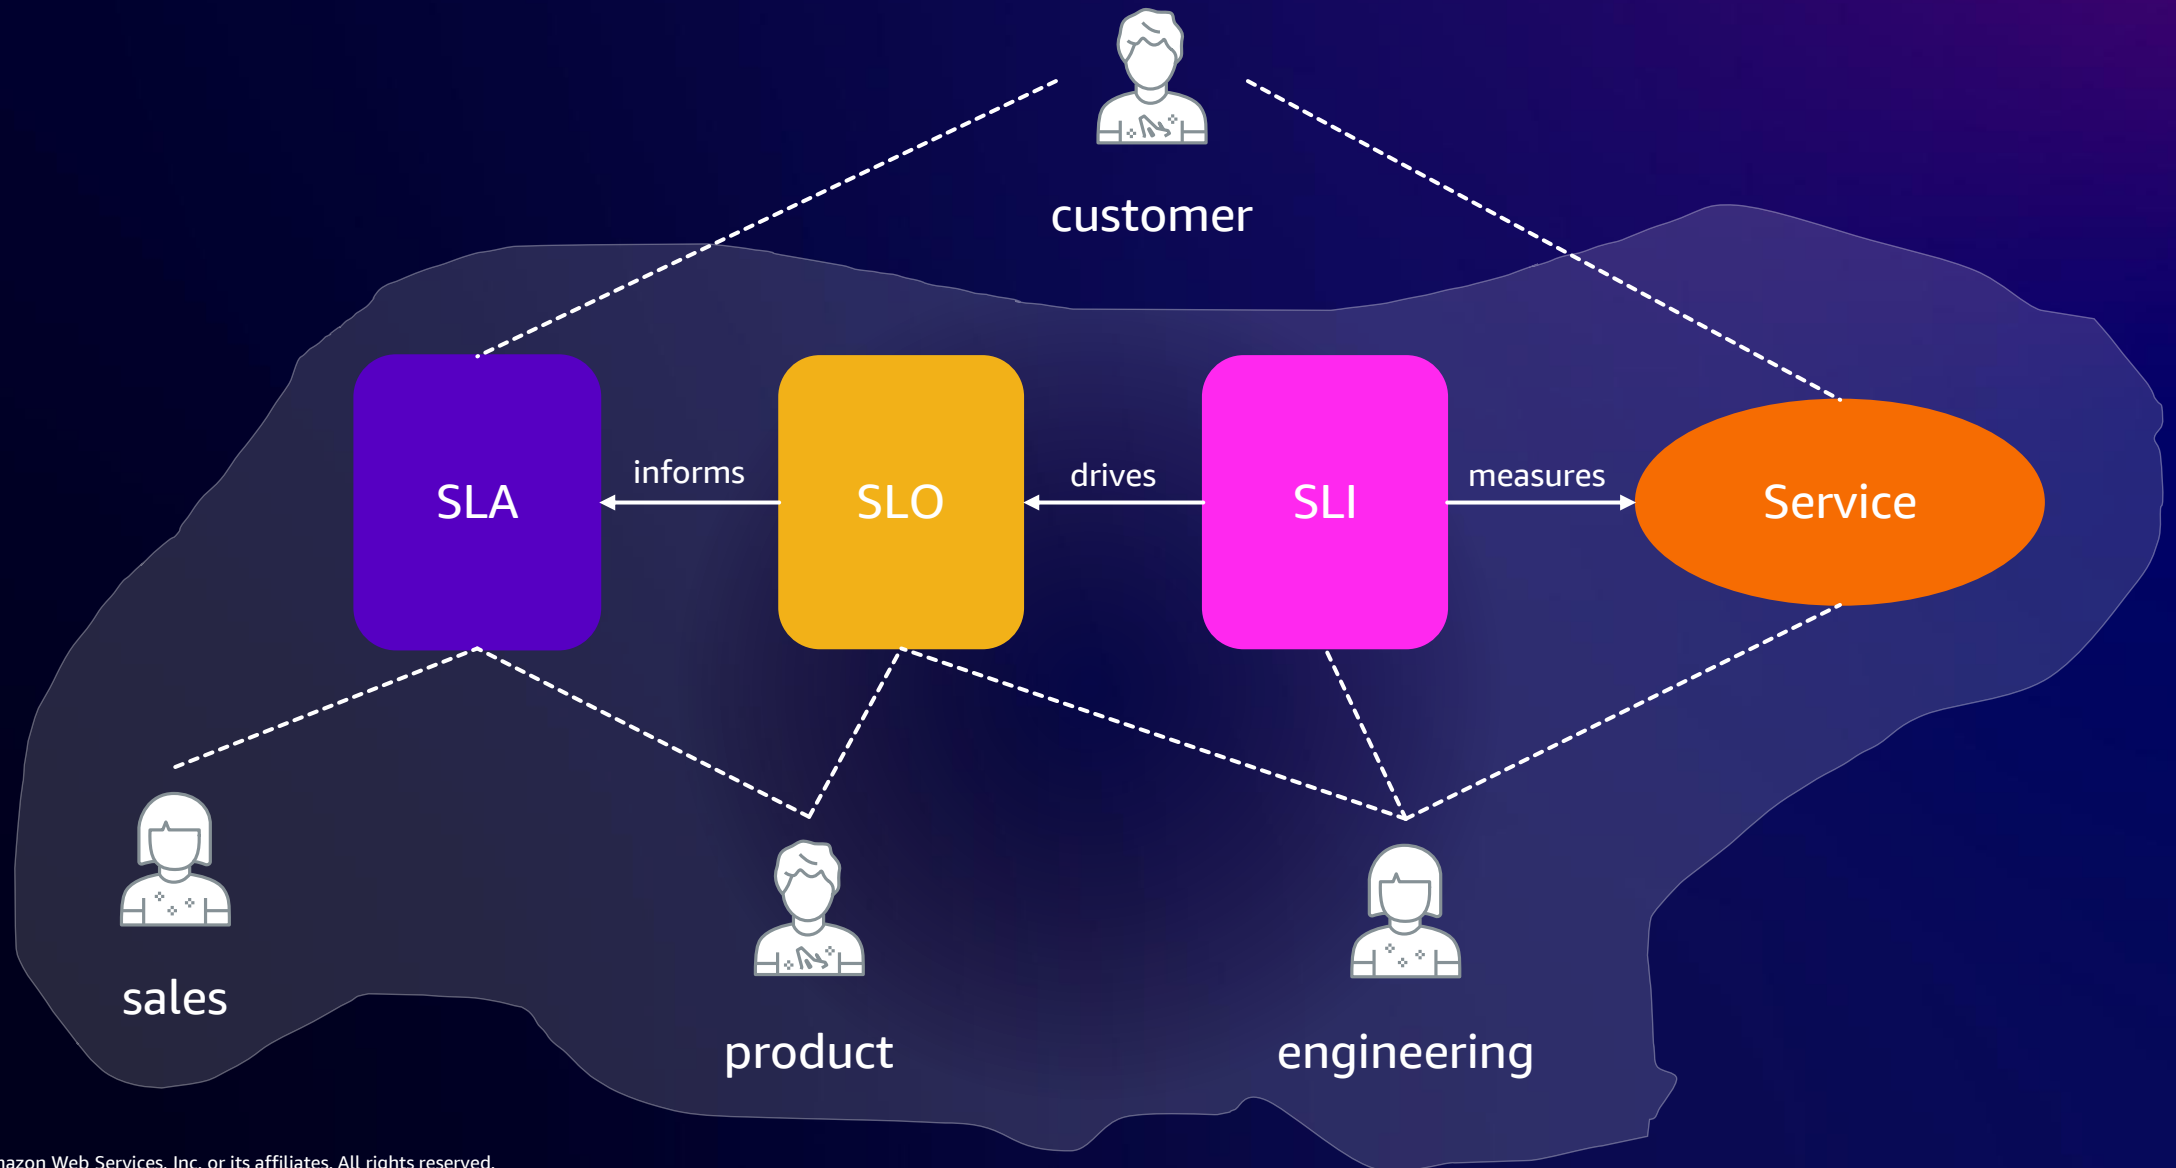

Learning goals

- ❑ Meaningful, realistic, and actionable SLOs
- ❑ Use SLOs to measure and report reliability
- ❑ Measure performance objectively
- ❑ Report reliability accurately

What does availability mean?

- ❑ Overall vs. service/feature level
- ❑ How does your customer experience the service?
- ❑ How do you measure the customer experience?

Terminology

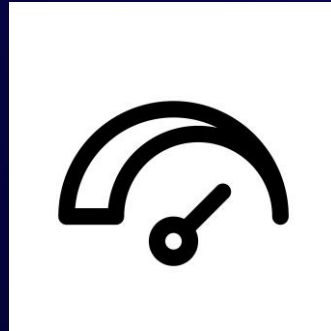

Effective SLOs

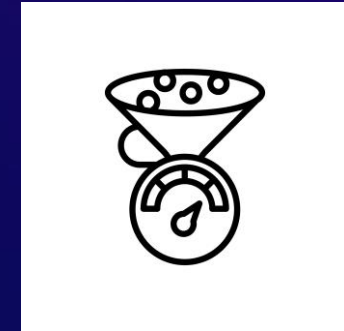

Availability

Did the application **respond** to the request successfully?

Latency

How **long** did it take for the application to respond?

Throughput

How **many** requests were handled?

Effective SLOs

Durability

Is the **data** still there when needed?

Correctness

Is the **right** data returned?

Cost

Reliability = **\$\$\$** savings

Common challenges

Capturing the
right metrics for
your SLIs

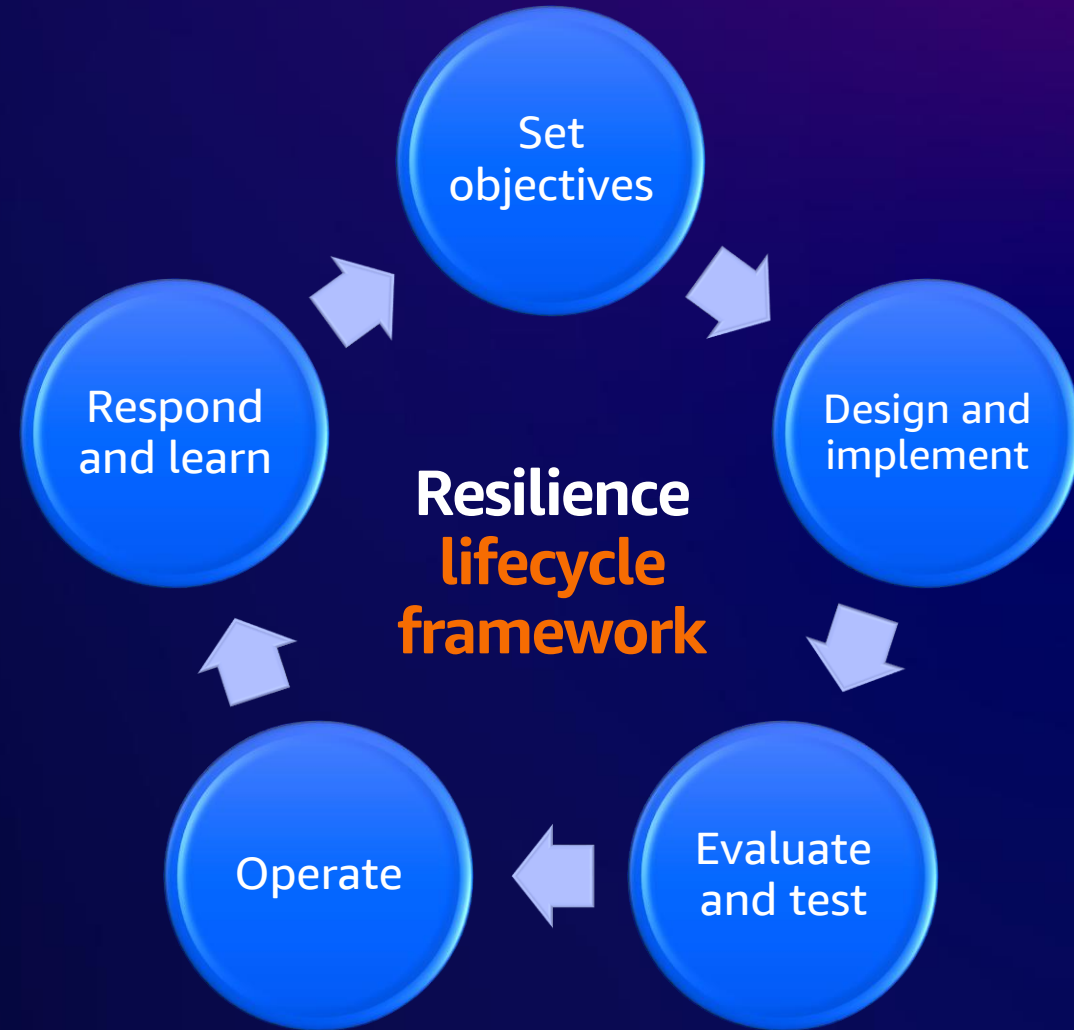

Calculating,
tracking, and
alerting on error
budgets

Connecting SLOs
to your
diagnostics tools

Best practices

1. Align on the **goal** across stakeholders
2. Optimize **service**, not system
3. Plan your **response** (automate, diagnostics)
4. **100% reliability** is not realistic
5. **Document, share,** and leverage **open standards**
6. **Iterate** as you go (feedback loop, reassess goals)

Call to action

✓ **Keynote:** Dr. Werner Vogels

When – Thursday, NOV. 30 | 8:30 AM – 10:30 AM

✓ Visit '**Observability Hub**'

Where – Mandalay Bay | South L2 | near T&C labs

✓ Visit '**Observability Kiosk**'

Where – Venetian | L2 | Hall C | Expo | AWS Village

✓ Try '**Self-Paced labs**'

Where – <https://reinvent.labs.aws.events.com/>
