

The background of the image features a dark blue gradient on the left, transitioning into a large, vibrant, abstract shape on the right. This shape is composed of overlapping curved segments in shades of orange, pink, and purple, creating a dynamic, modern aesthetic.

AWS re:Invent

NOV. 27 – DEC. 1, 2023 | LAS VEGAS, NV

COP316 - R

Automating incident response with Incident Manager

MaSonya Scott

Head of Partner Integrations Engineering
AWS Partner Services
Amazon Web Services

Mark Bychowski

Senior WorldWide Specialist
AWS Cloud Operations
Amazon Web Services

Agenda

AWS Cloud Operations

Incident management process/best practices (interactive)

How AWS services enable incident management

Incident Manager and ITSM integration demos

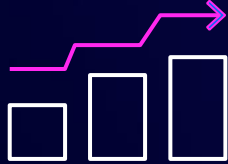

Resources to get started

Why AWS Cloud Operations (CloudOps)?

Return on investment (ROI)

241% ROI
over 3 years*

Staff productivity

62% more
efficient IT
infrastructure
staff

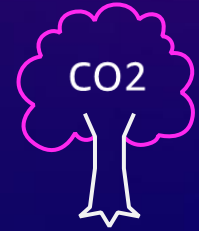

Operational resilience

57% decrease
in downtime

Business agility

37% decrease
in time
to market

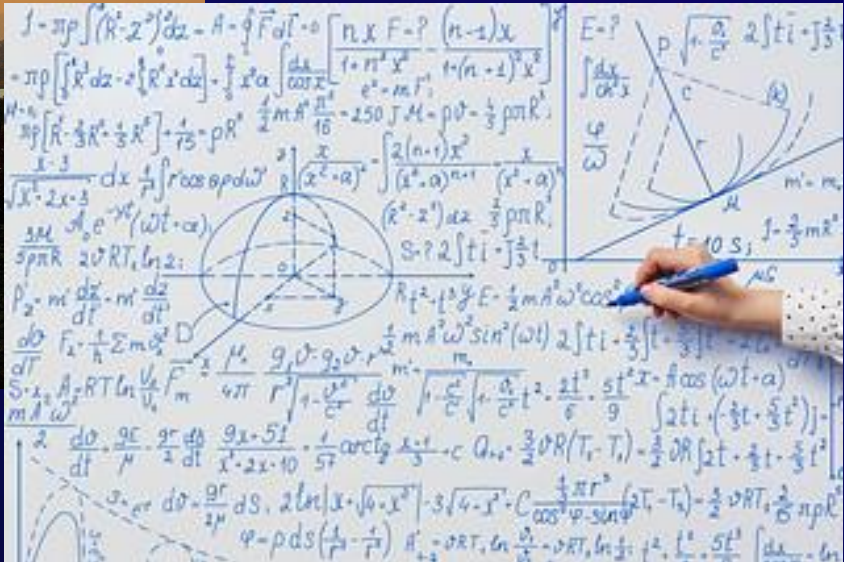

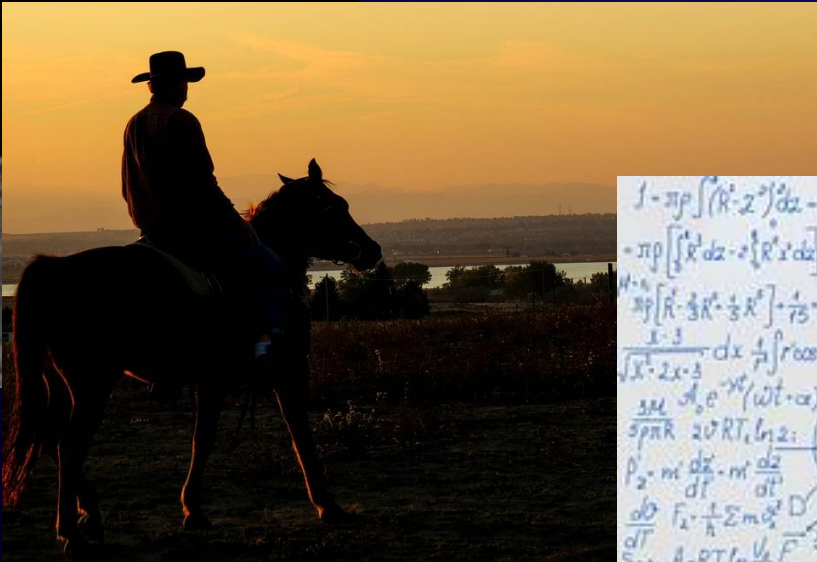

Carbon savings

88% reduction
in carbon
footprint of
IT operations

Based on independent research with thousands of AWS enterprise customers

*Source: Forrester, "The Total Economic Impact of AWS Cloud Operations: Cost Savings and Business Benefits Enabled by Operating on AWS" (May 2022). A commissioned study conducted by Forrester Consulting on behalf of Amazon Web Services.

Customer challenges

Incident management use case

- AnyCompany's application processes customer payments for a major online and physical retail organization
- The application is built on Amazon EC2, Amazon S3 in a single AWS account with redundancy across Regions
- The application is supported by a global DevOps team with primary and secondary support resources in multiple offices and homes around the world

**It's 3:00 AM and your
app is down.**

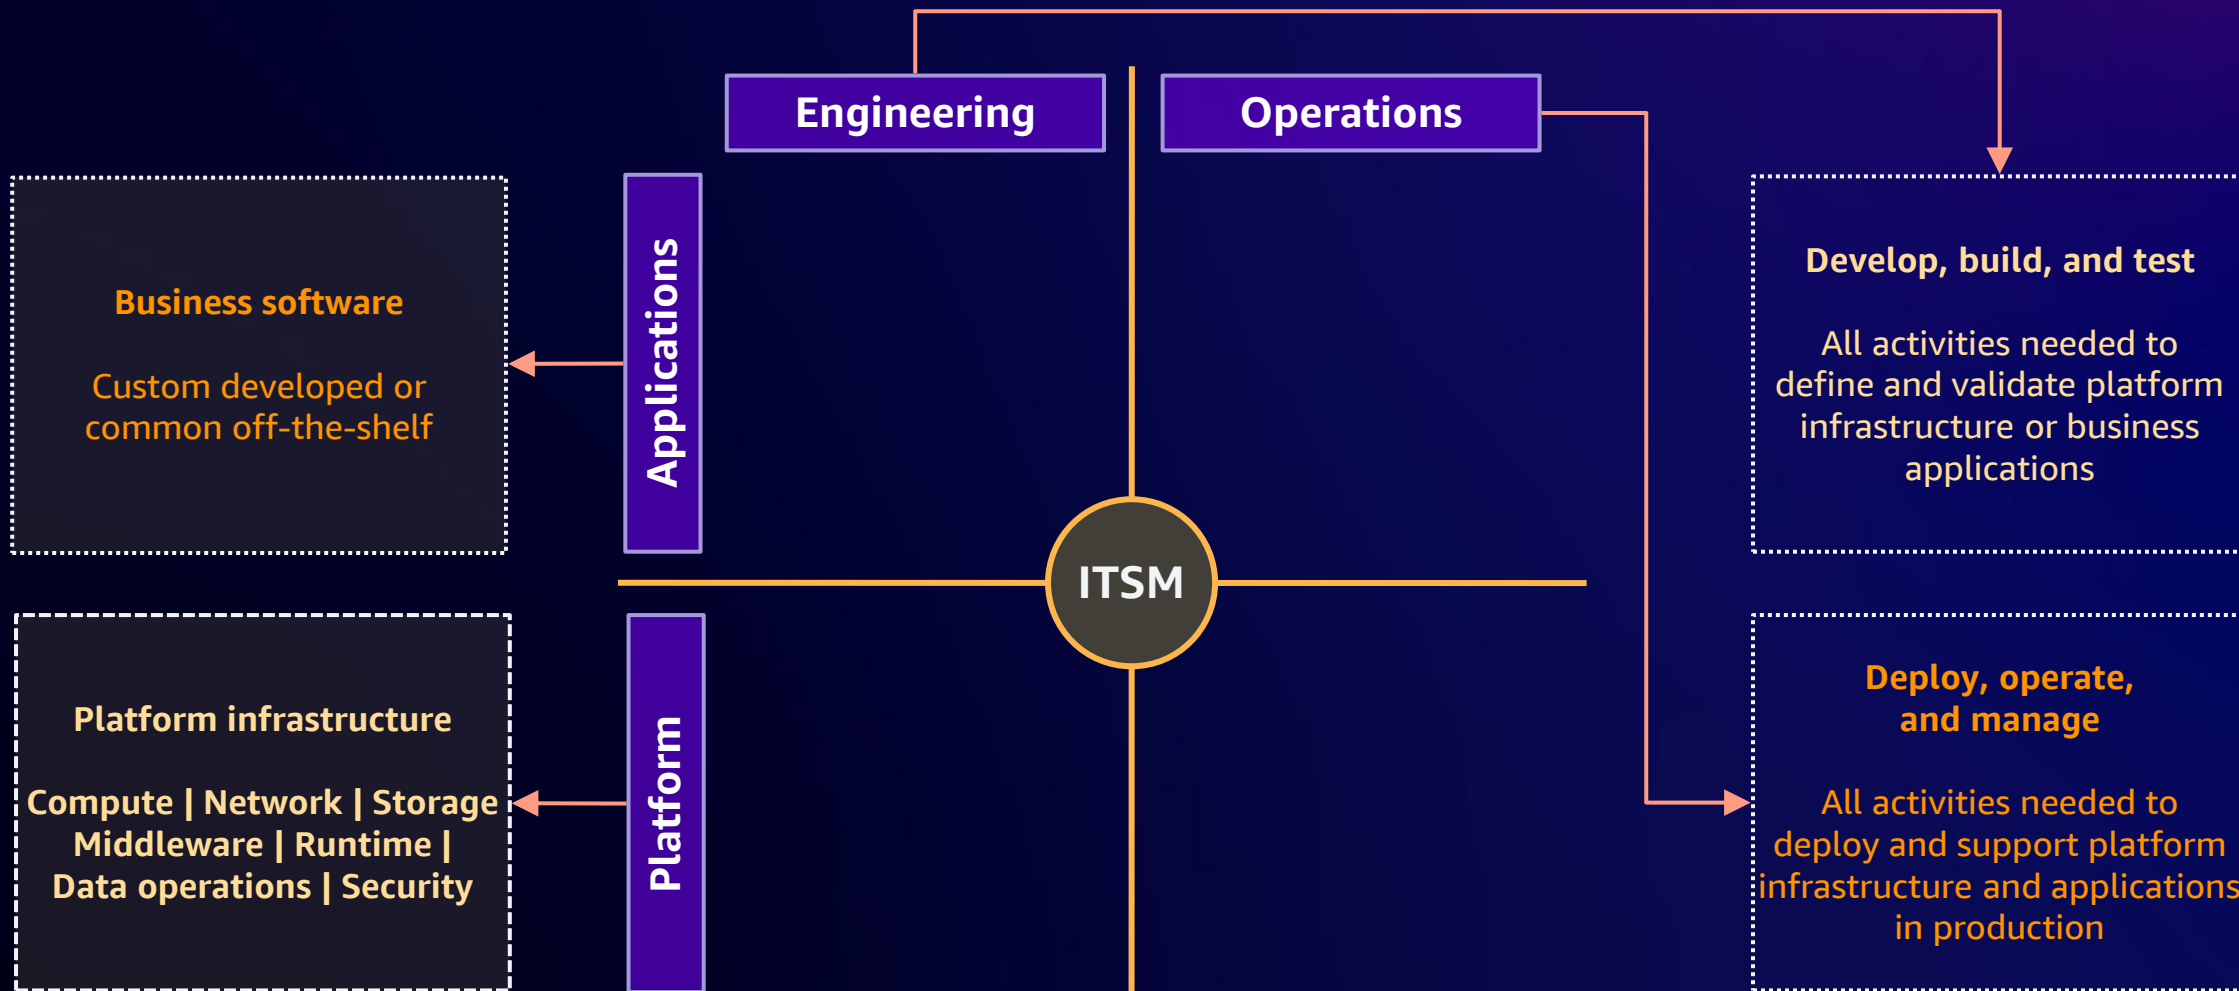

Who you gonna call?

CloudOps conceptual model (reference slide)

How do we define cloud operating model frameworks?

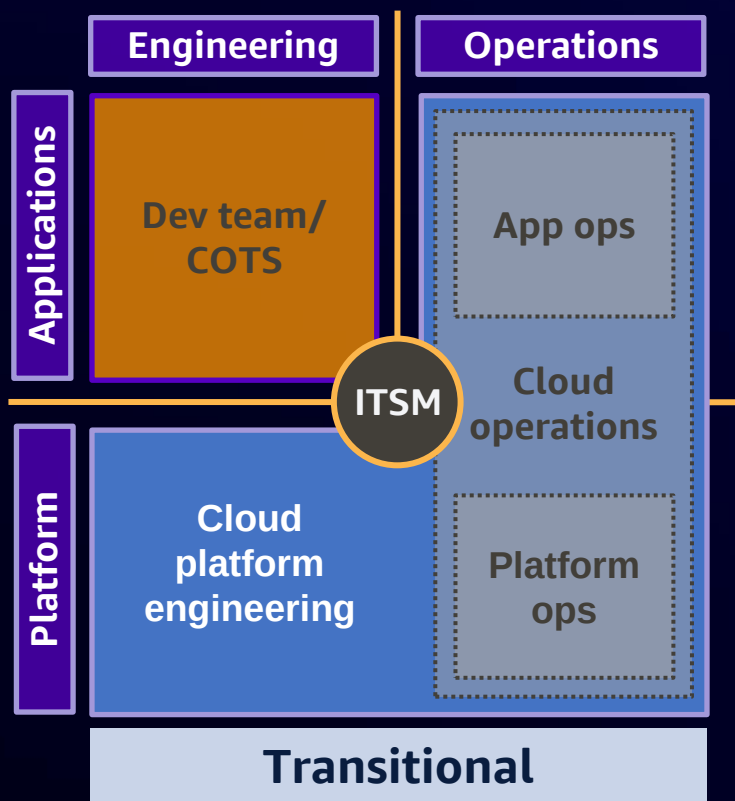

Using a simple 2x2 matrix, we can illustrate who is responsible for different pieces of the IT lifecycle

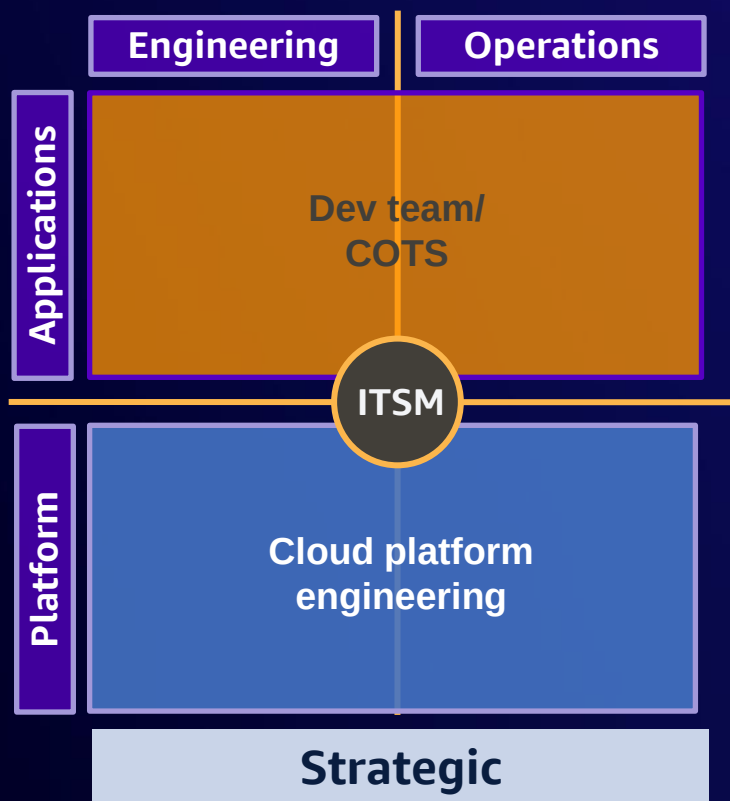

Common patterns (reference slide)

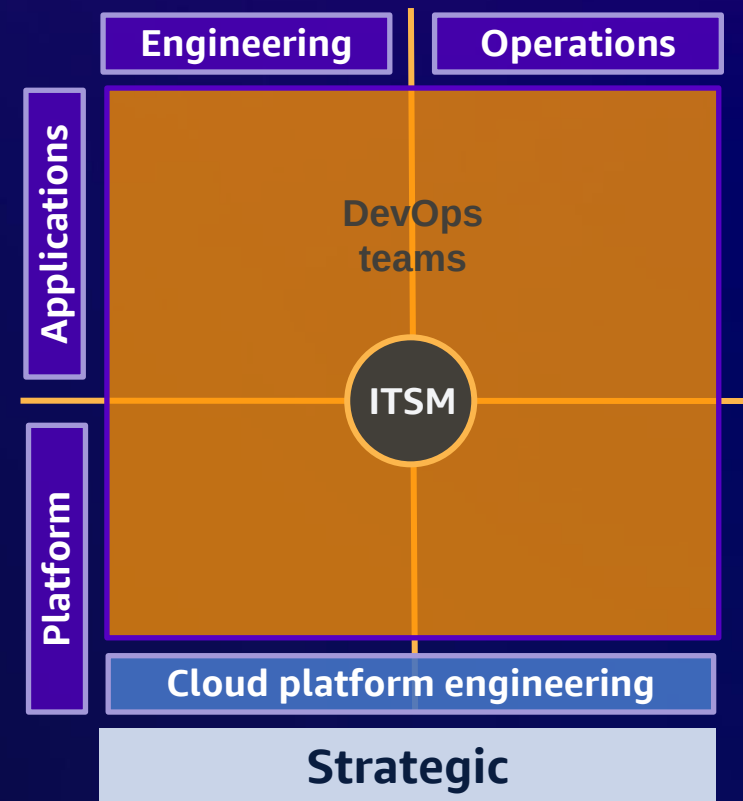

Sustain
"Traditional ops"

Optimize
"CloudOps"

Grow
"DevOps"

Preparing for and responding to incidents

- 1 Prepare for the **who, what, and where** in a response plan
- 2 Attach **response plans** to monitors
- 3 Manage and track in **Incident Manager**

Response plan

Contacts, on-call schedule,
and escalation plans

Who you engage

Automated runbooks

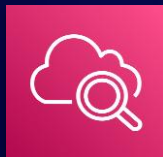

What you do

AWS Chatbot

Where you collaborate

Triggers (event sources)
