

The background of the image features a dark blue gradient on the left, transitioning into a large, vibrant, abstract shape on the right. This shape is composed of overlapping curved segments in shades of orange, pink, and purple, creating a dynamic, modern aesthetic.

AWS re:Invent

NOV. 27 – DEC. 1, 2023 | LAS VEGAS, NV

The image features a collage of several US one-dollar bills scattered across a brown, corrugated cardboard background. A rectangular section of the cardboard has been torn out, revealing a white surface. On this white surface, the word "Resilience" is printed in a large, bold, black serif font. The bills are partially overlapping and show various details such as the portrait of George Washington, the serial numbers (e.g., B33914569C, E94297185C, E37860744A, B03578025F), and the text "THE UNITED STATES OF AMERICA" and "FEDERAL RESERVE NOTE".

What is resilience?

Resilience refers to the ability of workloads to respond to and quickly recover from failures

The business impact of resilience

Negative impact on partners

Customer dissatisfaction

Reputational damage

Missed regulatory requirements

Operational stress

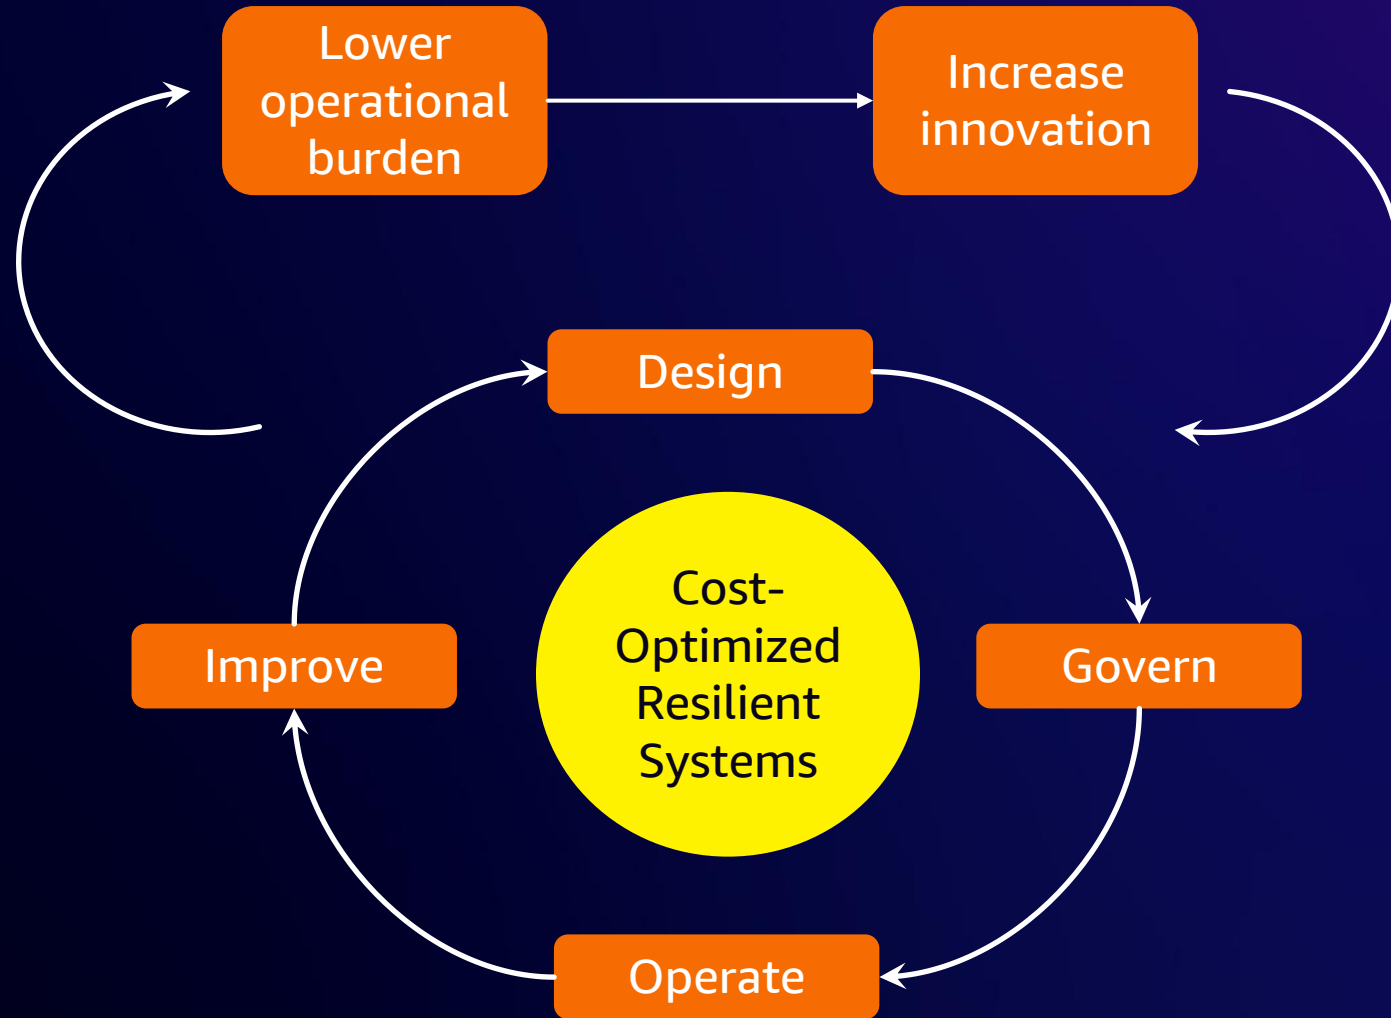

Compromised reliability and performance

Decreased workforce productivity

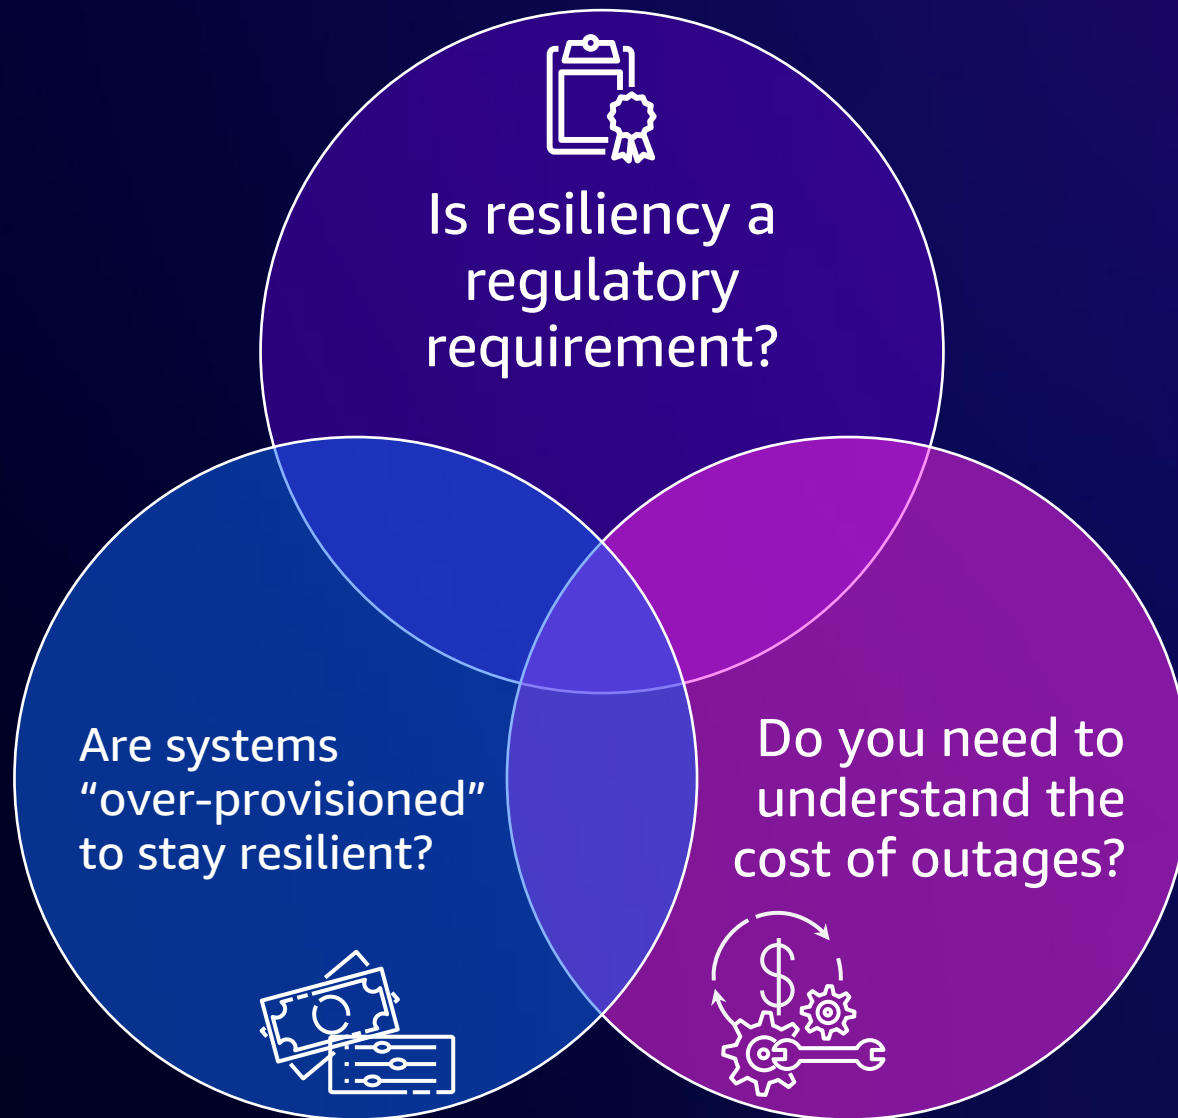

Resilience cost considerations

Organization	Technology and data	People
Revenue loss	Loss of data	New recruitment
Reputation	System Maintenance	Productivity loss
Legal fees	Cost to Security	Context switching
Corporate stakeholders	Loss of availability	Employee morale
Organization planning	Dependent systems	Upskilling

Operational flywheel

What are your resilience goals?

Let's whiteboard

Key takeaways

1

Requirements

RTOs and RPOs should align to business values delivered by the workload. Assess, validate, and optimize workloads using AWS Resilience Hub.

2

Observability

Measure resilience cost at every phase of product lifecycle. Leverage Cloud Intelligence Dashboards to track static and dynamic costs.

3

Culture

Culture of FinOps and resilience should coexist. Continuously test workload resilience and business continuity plans to proactively optimize costs.
