Call to action

Mainframe customer needs

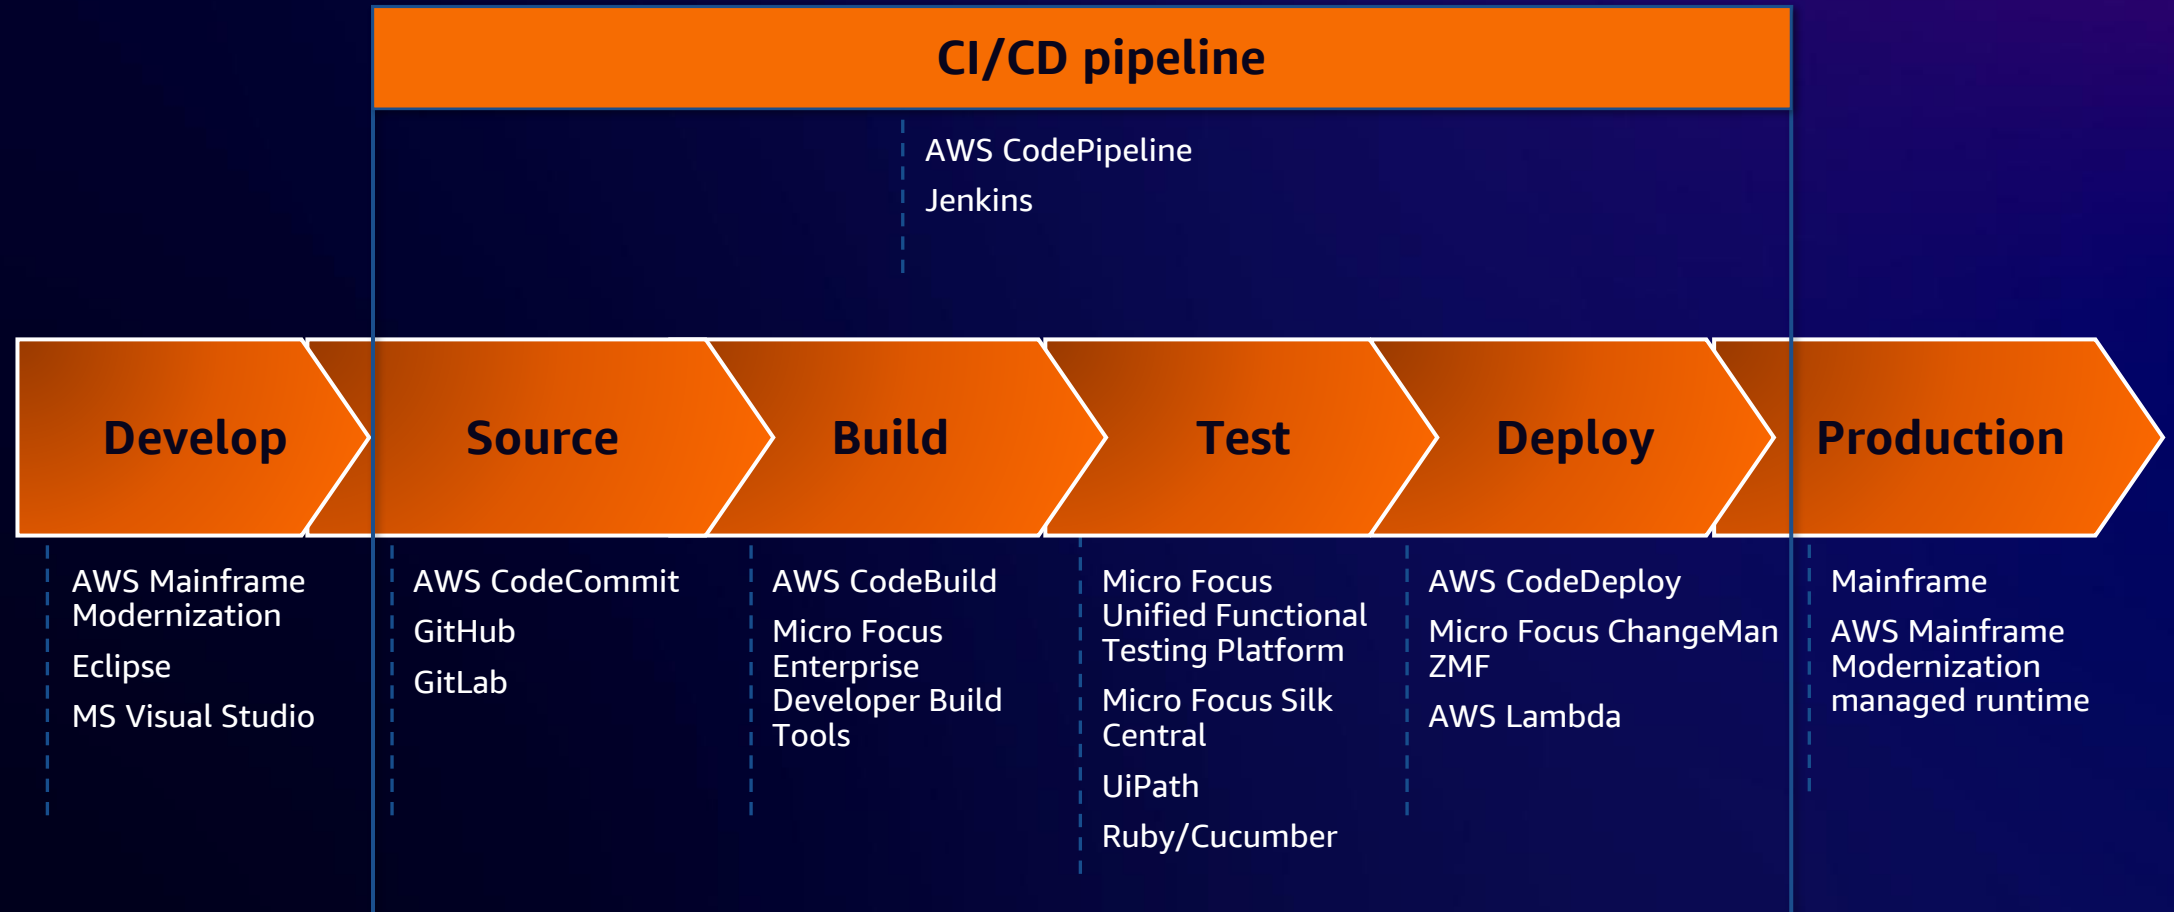

I **operate my mission-critical applications on my mainframe(s)**, but I want to:

- Deliver new business features faster
- Raise the quality of my feature deliverables
- Increase my development agility
- Avoid the need for additional mainframe capacity
- Innovate and scale

Multiple teams developing and testing on mainframe applications on AWS

Wide choice of tools and high flexibility

Whiteboarding

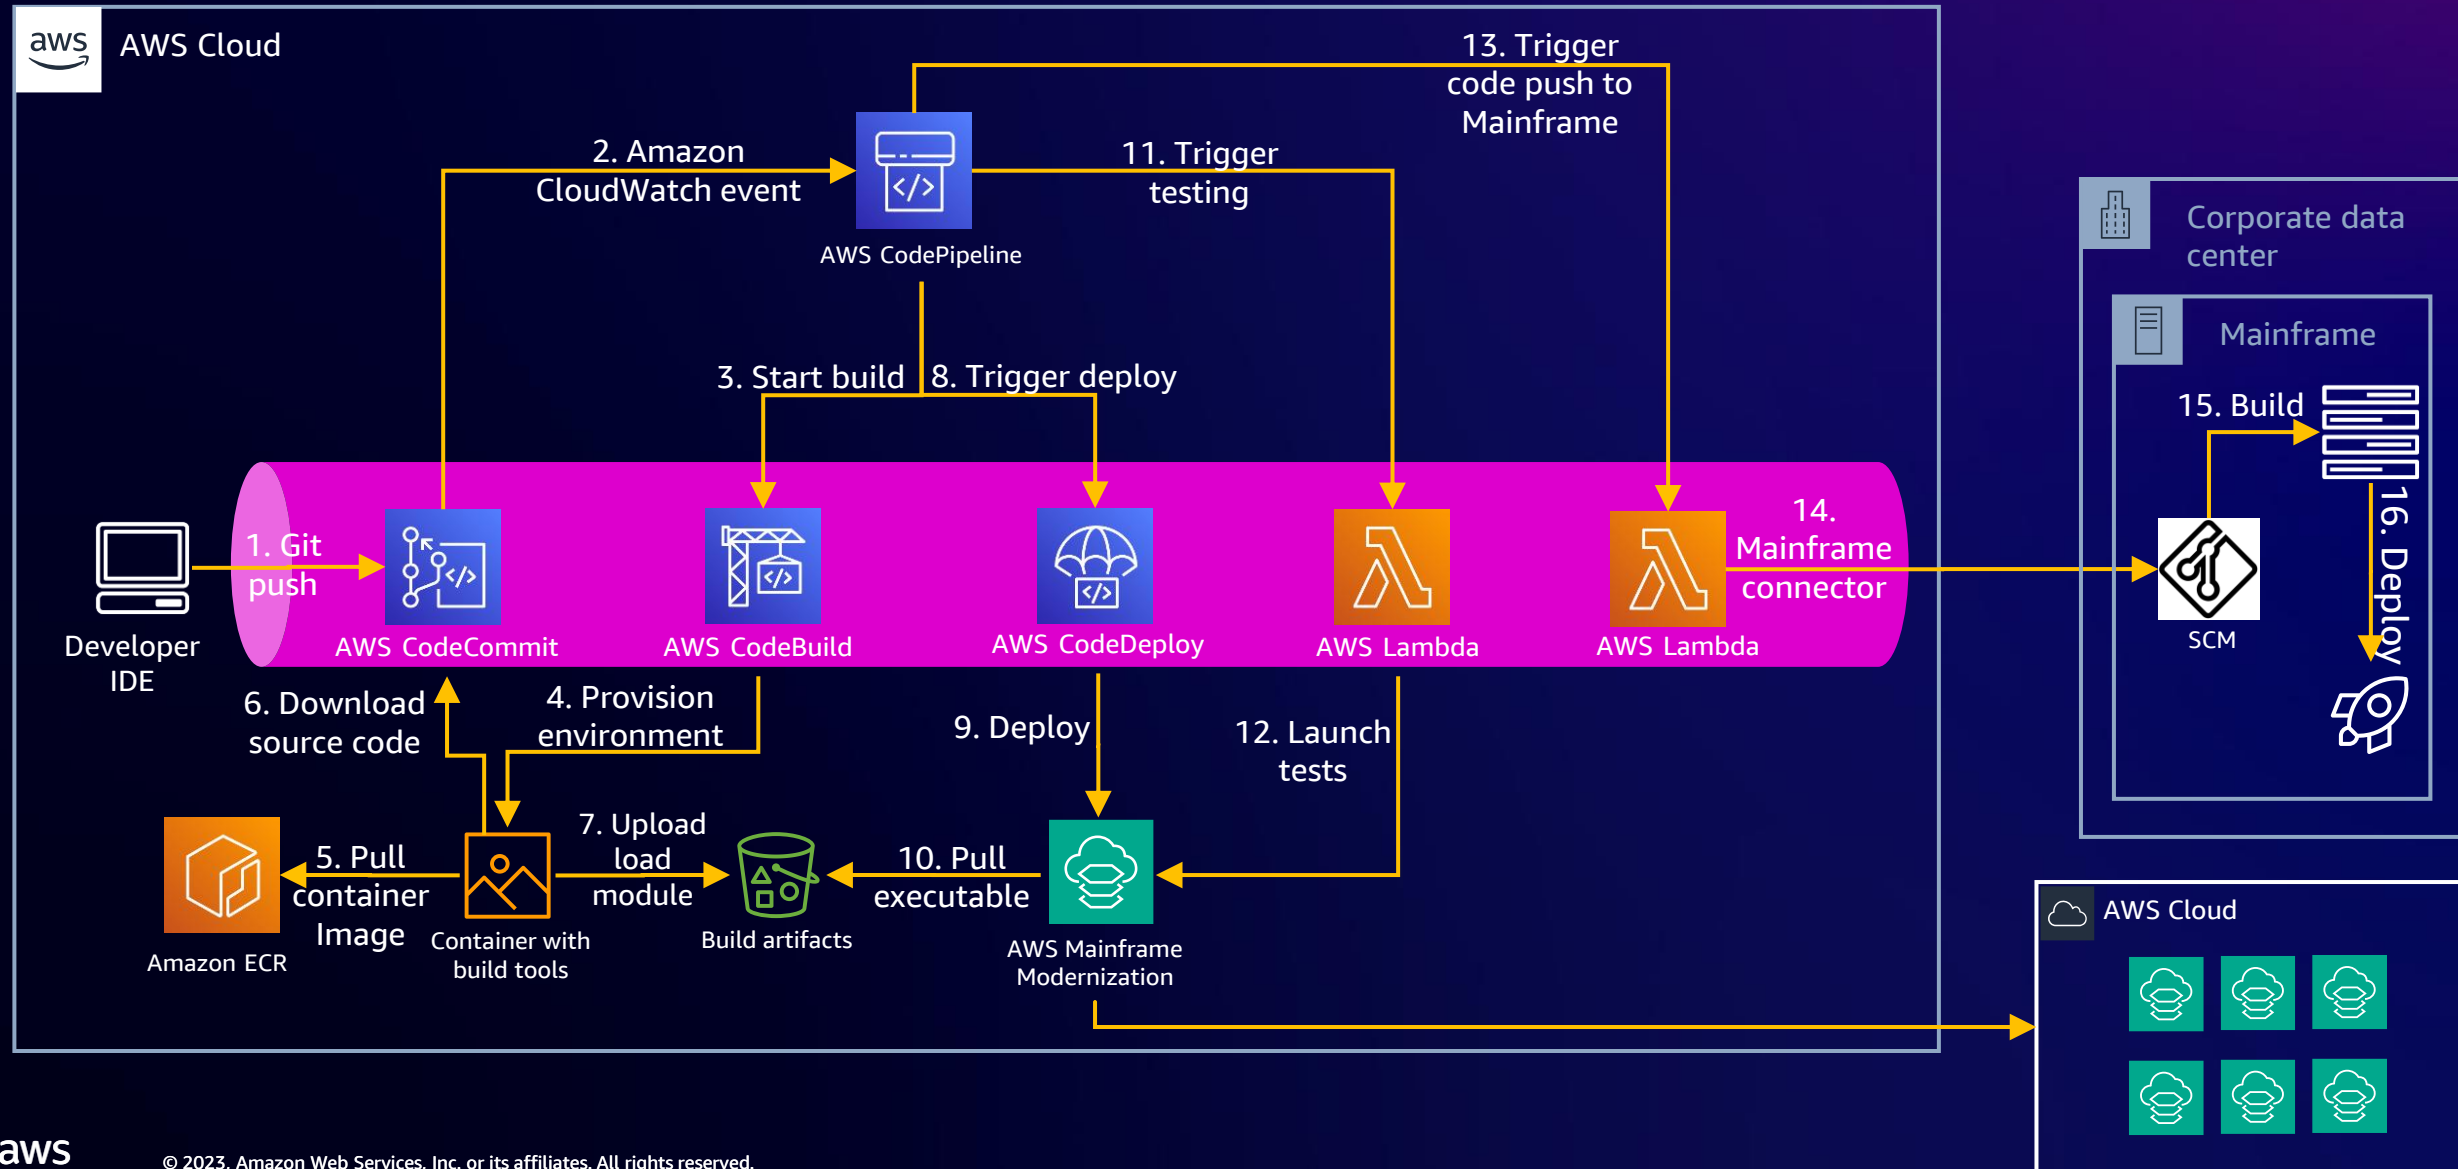

Call to action

Key architectural features for your design

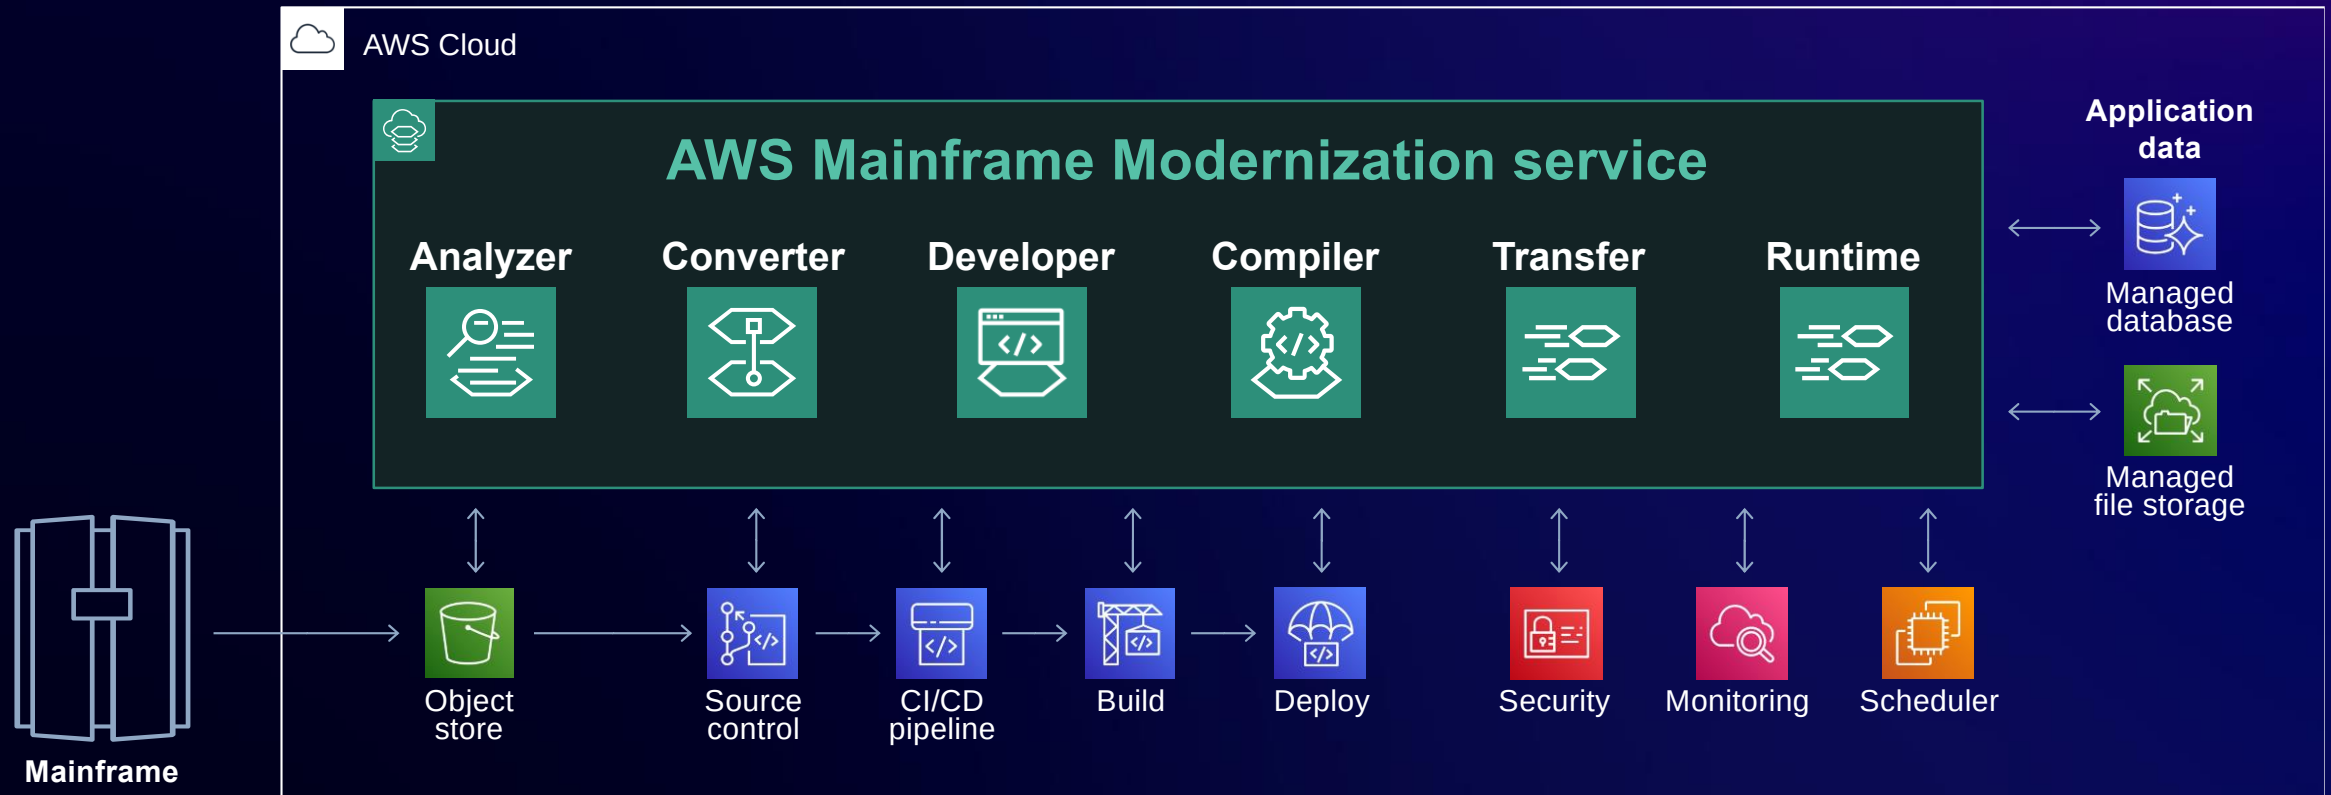

Development and test – COBOL CI/CD pipeline on AWS

Shared components with managed service

Augmentation <> Migration: Different goals but shared components

Augmentation of development on AWS Cloud - Benefits

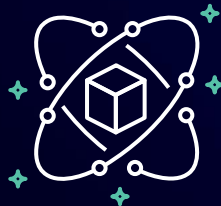

Increased productivity

- Individual environment
- Efficient end-to-end toolchain
- Collaborative work

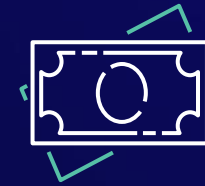

Improved quality

- More tests (frequency/scale)
- Non-regression validation
- Fast incremental progress

Agility

- DevOps
- On-demand
- Incremental changes
- Rapid innovation

Cost efficiency

- Reduced mainframe costs
- Pay as you go
- Elastic infrastructure
- Low cost of entry
