Agenda

- Container risks and threats
- Containers landscape on AWS
- Best practices for securing containers on Amazon EKS

“

Gartner estimates that **95%** of global organizations will be **running containerized applications** in production by **2028**”

Gartner

A CTO's Guide to Navigating the Cloud-Native Container Ecosystem,
March 2023

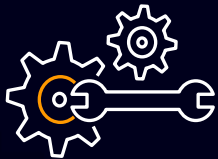

Containers risks and threats

Violation of least privilege: When a user or system is granted more access or permissions than necessary for their specific role or task

Insecure networking: A network configuration or setup that lacks sufficient security measures

Clusters and containers misconfigurations: Security or operational flaws in the setup and settings of clusters and containerized applications

Containers risks and threats

Threats actors and CVEs: Individuals or entities attempting to exploit vulnerabilities and malwares targeted to containers

Compromised software supply chain: Compromised software deployment pipeline

Containers landscape on AWS

Management

Deployment, scheduling, scaling, and management of containerized applications

Amazon ECS

Amazon EKS

Hosting

Where the containers run

Amazon EC2

AWS Fargate

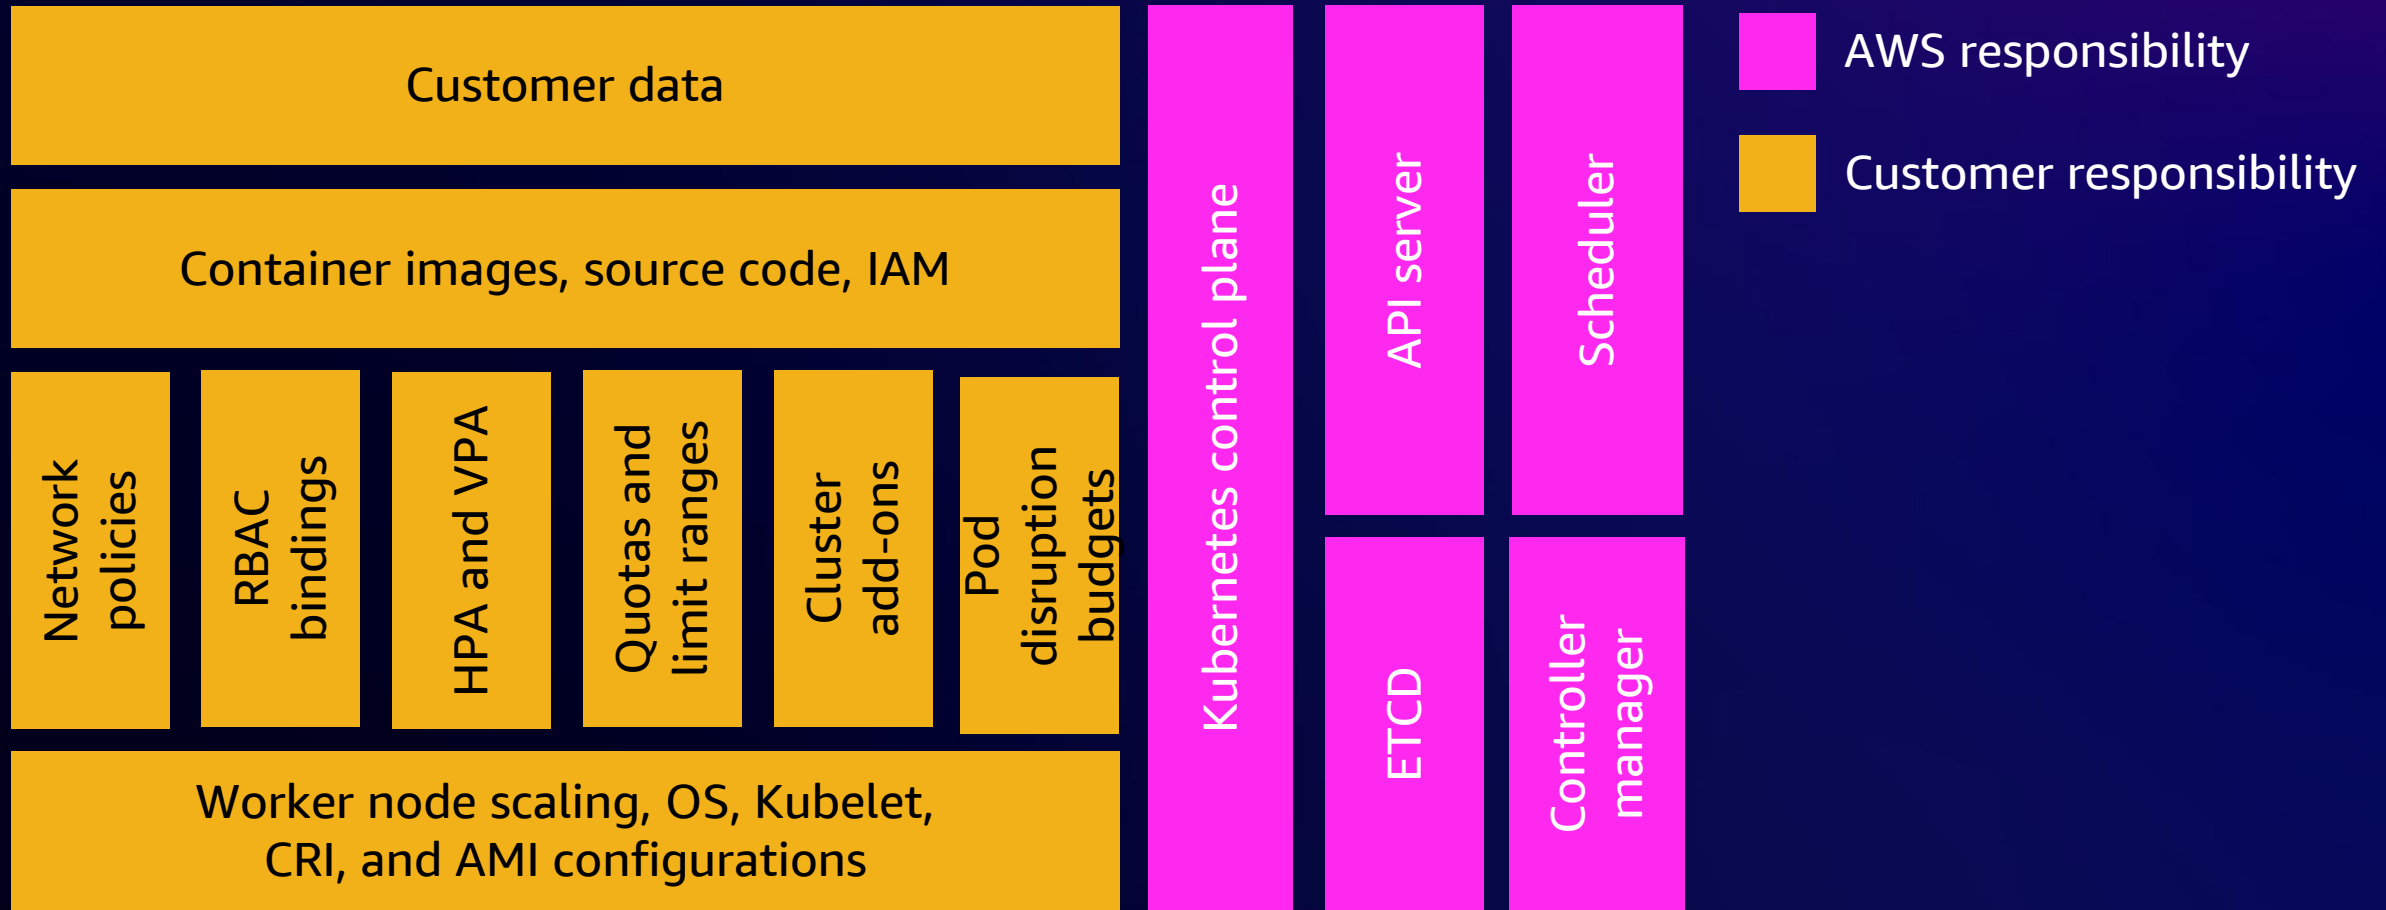

Image registry

Container image repository

Amazon ECR

Amazon EKS Shared Responsibility Model

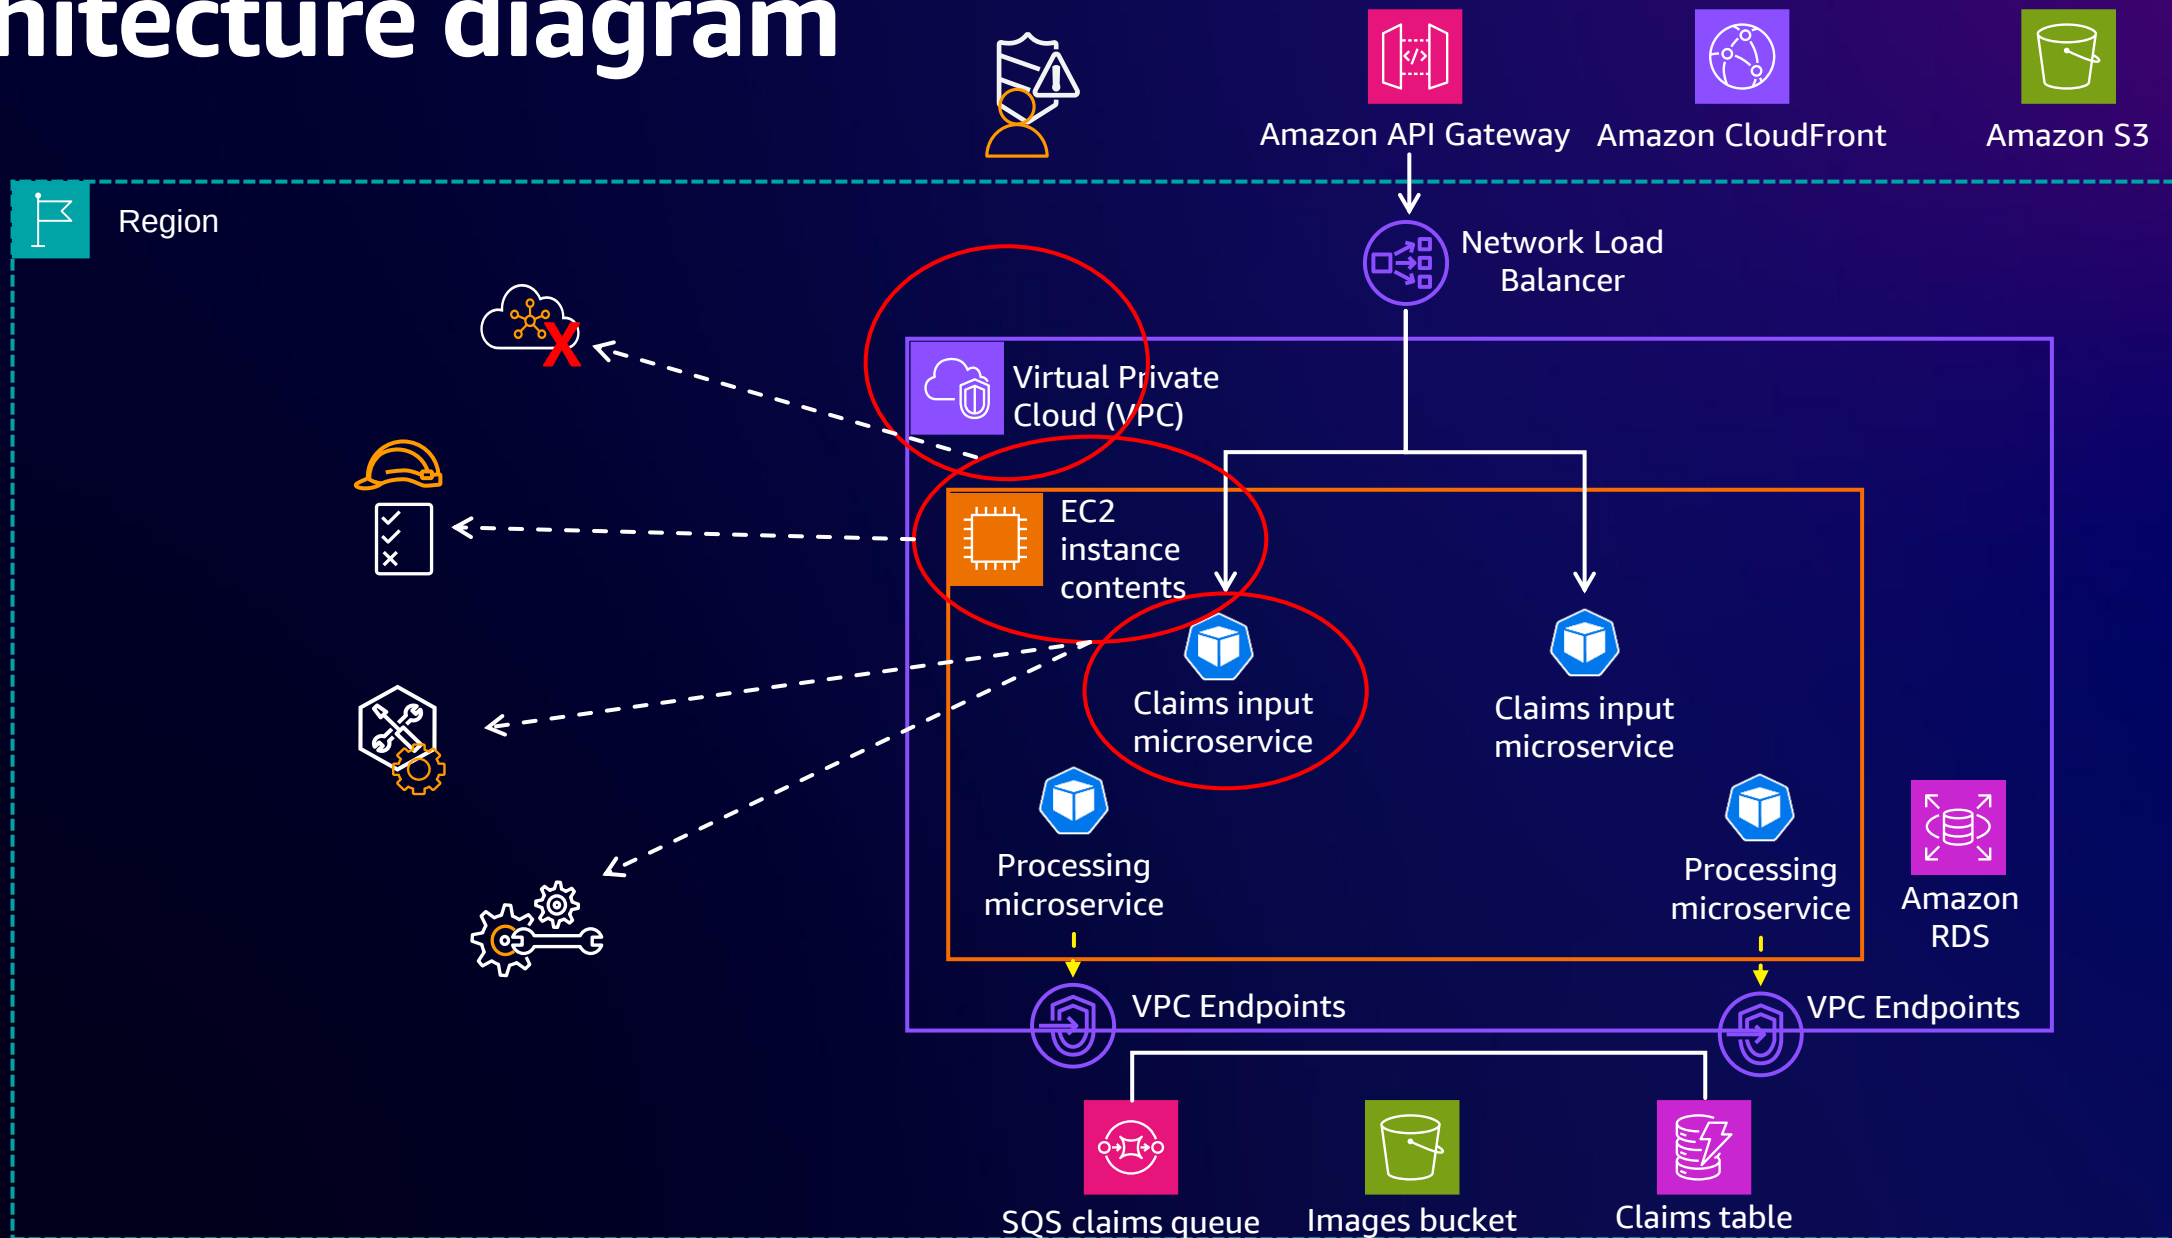

Today's goal

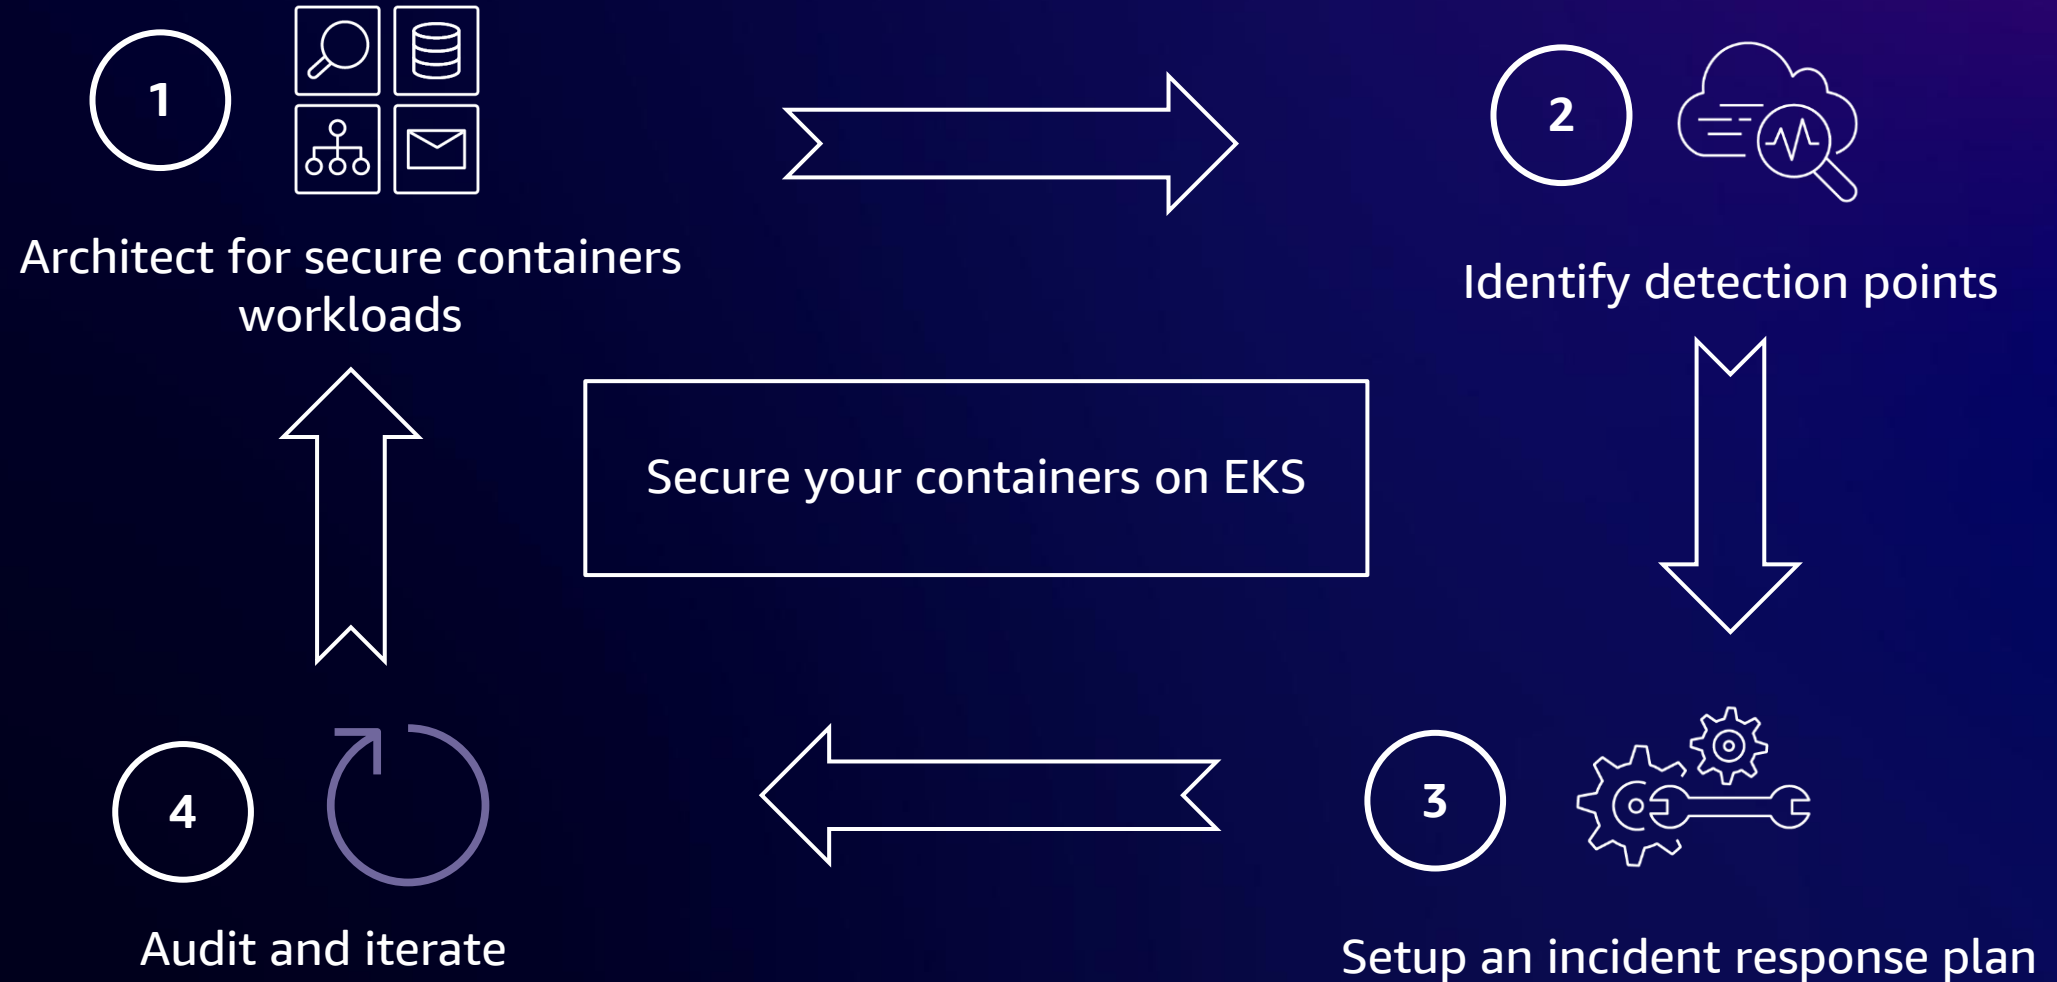

Provide best practices for
securing your containers on
Amazon EKS

Let's whiteboard!
