

The background of the image features a dark blue gradient on the left, transitioning into a large, vibrant, abstract shape on the right. This shape is composed of overlapping curved segments in shades of orange, pink, and purple, creating a dynamic, modern aesthetic.

AWS re:Invent

NOV. 27 – DEC. 1, 2023 | LAS VEGAS, NV

NET315 - R

Building Zero Trust architectures using AWS Verified Access

Riggs Goodman III

Principal Tech Lead, AWS Networking
and Security Partners

What is Zero Trust network access?

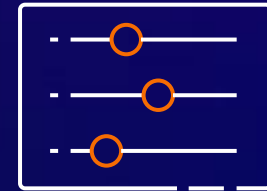

What's driving Zero Trust

Evolving workforce
landscape

Shifting regulatory
requirements

Need for more precise
access controls

Enabling friction-free access to internal apps

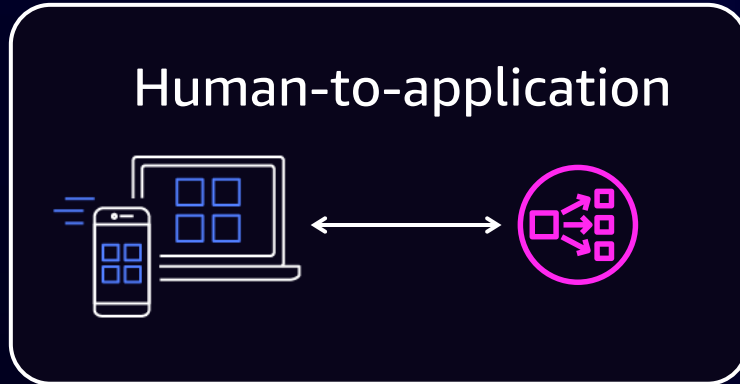

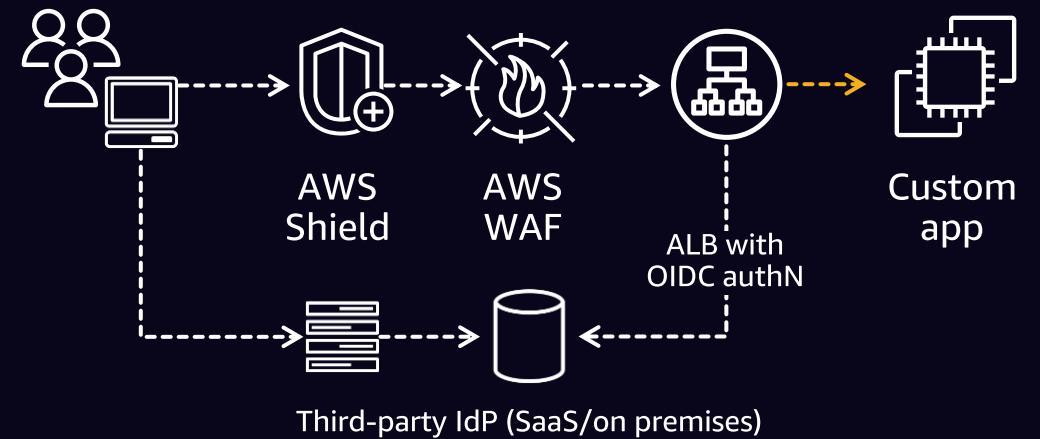

Originally

THROUGH VPN

Then

SOME ASSEMBLY REQUIRED

AWS Verified Access

Provide secure access to corporate applications without a VPN

Improve your security posture

Improve end user experience

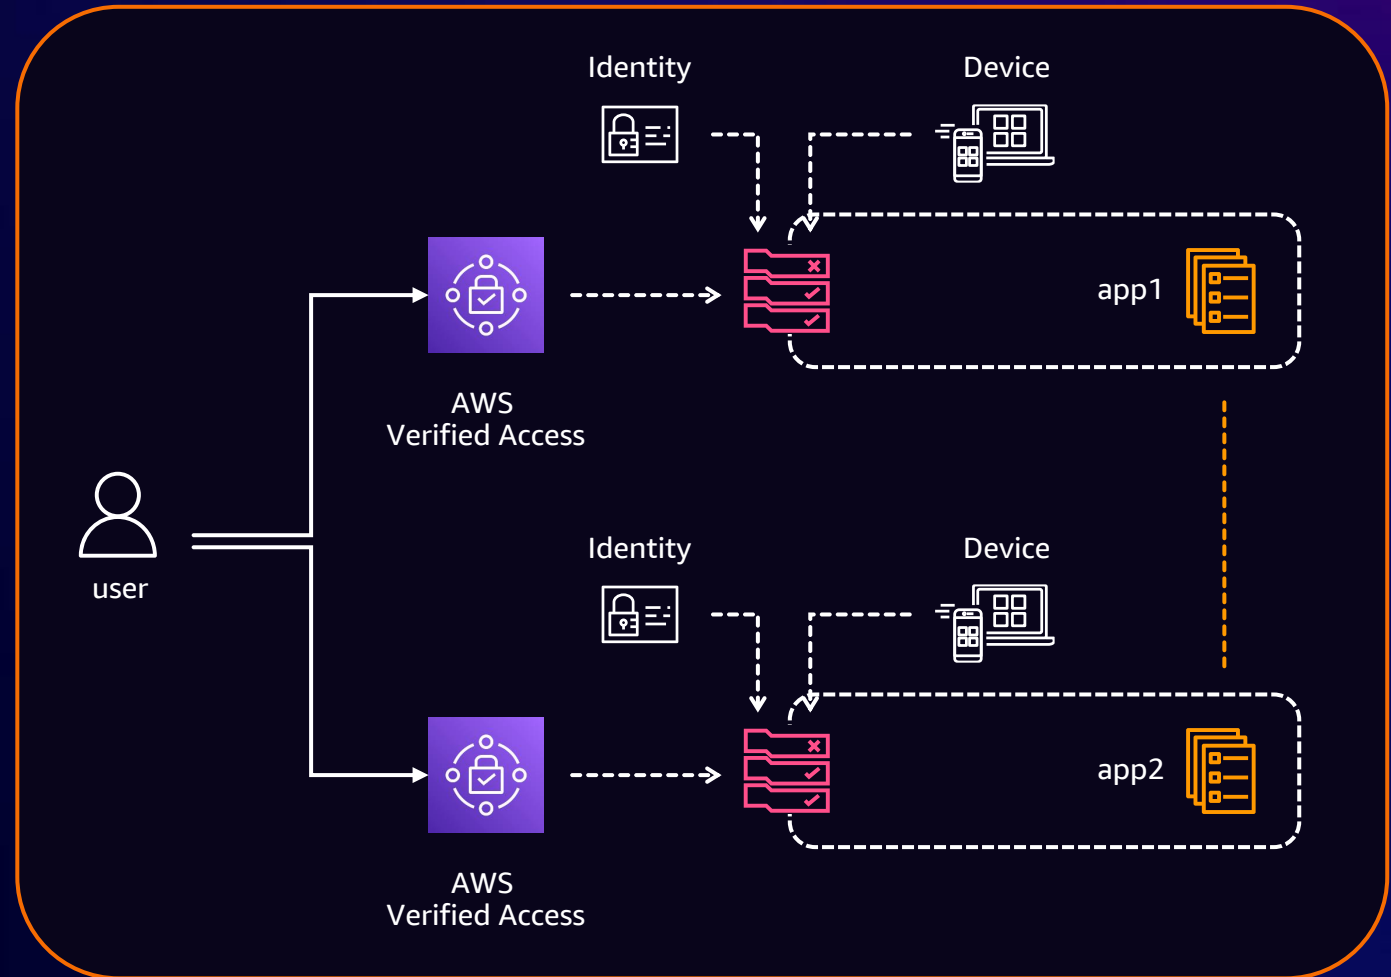

Simplify operations

AWS Verified Access for Zero Trust architectures

Multiple security signals to strongly verify access

Continuous verification

More sources for stronger verification

Evaluate trust for each request

AWS Verified Access Partners

Device Trust Partners

Identity/Network Partners

SIEM/Observability Partners

**Now for the fun part . . . ask us
anything**

Thank you!
